Edge Intelligence in the Making Sen Lin,Zhi Zhou,Zhaofeng Zhang,Xu Chen,Junshan Zhang,2022-06-01 With the explosive growth of mobile computing and Internet of Things IoT applications as exemplified by AR VR smart city and video audio surveillance billions of mobile and IoT devices are being connected to the Internet generating zillions of bytes of data at the network edge Driven by this trend there is an urgent need to push the frontiers of artificial intelligence AI to the network edge to fully unleash the potential of IoT big data Indeed the marriage of edge computing and AI has resulted in innovative solutions namely edge intelligence or edge AI Nevertheless research and practice on this emerging inter disciplinary field is still in its infancy stage To facilitate the dissemination of the recent advances in edge intelligence in both academia and industry this book conducts a comprehensive and detailed survey of the recent research efforts and also showcases the authors own research progress on edge intelligence Specifically the book first reviews the background and present motivation for AI running at the network edge Next it provides an overview of the overarching architectures frameworks and emerging key technologies for deep learning models toward training inference at the network edge To illustrate the research problems for edge intelligence the book also showcases four of the authors own research projects on edge intelligence ranging from rigorous theoretical analysis to studies based on realistic implementation Finally it discusses the applications marketplace and future research opportunities of edge intelligence This emerging interdisciplinary field offers many open problems and yet also tremendous opportunities and this book only touches the tip of iceberg Hopefully this book will elicit escalating attention stimulate fruitful discussions and open new directions on edge intelligence

Difficult Subjects Badia Ahad-Legardy,OiYan A. Poon,2023-07-03 Difficult Subjects Insights and Strategies for Teaching about Race Sexuality and Gender is a collection of essays from scholars across disciplines institutions and ranks that offers diverse and multi faceted approaches to teaching about subjects that prove both challenging and often uncomfortable for both the professor and the student It encourages college educators to engage in forms of practice that do not pretend that teachers and students are unaffected by world events and incidents that highlight social inequalities Readers will find the collected essays useful for identifying new approaches to taking on the difficult subjects of race gender and sexuality The book will also serve as inspiration for academics who believe that their area of study does not allow for such pedagogical inquiries to also teach in ways that address difficult subjects Contributors to this volume span a range of disciplines from criminal justice to gender studies to organic chemistry and demonstrate the productive possibilities that can emerge in college classrooms when faculty consider

identity as constitutive of rather than divorced from their academic disciplines Discussions of race gender and sexuality are always hot button issues in the college classroom whether they emerge in response to a national event or tragedy or constitute the content of the class over a semester long term Even seasoned professors who specialize in these areas find it difficult to talk about identity politics in a room full of students And many professors for whom issues of racial and sexual identity is not a primary concern find it even more challenging to raise these issues with students Offering reflections and practical guidance the book accounts for a range of challenges facing college educators and encourages faculty to teach with courage and conviction especially when it feels as though the world around us is crashing down upon our students and ourselves

**Higher Education - Reflections From the Field - Volume 1**, 2023-11-02 COVID wrought havoc on the world's economic systems Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems Some institutions were prepared for the required transition to online learning Most were not Whether prepared or not educators rose to the challenge The innovativeness of educators met the challenges as digital learning replaced the face to face environment In fact some of the distance models proved so engaging that many students no longer desire a return to the face to face model As with all transitions some things were lost while others were gained This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century The book is organized into four sections on The Perspectives of Higher Education COVID as a Catalyst for Change Embracing Online Learning as a Response to COVID and Post Covid The Way Forward It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process These discussions shed light on the impact of the pandemic and the future of higher education post COVID Higher education has been forever changed and higher education as it once was may never return While many questions arise the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic

*Google Earth Engine Applications* Lalit Kumar, Onesimo Mutanga, 2019-04-23 In a rapidly changing world there is an ever increasing need to monitor the Earth's resources and manage it sustainably for future generations Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard Satellite based earth observation has advanced rapidly over the last 50 years and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions

The amount of data available for any single location on the Earth is now at the petabyte scale. An ever increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud based computing platform that was established by Google to support such data processing. This facility allows for the storage, processing and analysis of spatial data using centralized high power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment and gross primary productivity among others. Datasets used range from coarse spatial resolution data such as MODIS to medium resolution datasets Worldview 2 and the studies cover the entire globe at varying spatial and temporal scales. *Advances in Operations*

*Research Education* Jeroen Beliën, Ana Paula Teixeira, Hans W. Ittmann, João Luís de Miranda, Marco Laumanns, Margarida Vaz Pato, 2018-02-16. This edited monograph contains a comprehensive overview of educational developments in the fields of operations research (OR) and management science (MS). The book outlines key factors in OR/MS curricular programs and analyses different approaches regarding student enrollment and failure rates. The approach is genuinely international, whereas the focus lies on the European level. The target audience primarily comprises public policy planners in education, deans and school directors as well as program coordinators. *Virginia Woolf and the World of Books* Nicola Wilson, Claire Battershill, 2018-09-27. A celebration of the centenary of the founding of Leonard and Virginia Woolf's Hogarth Press.

*Latin American Blackberries Biology* Fernando Ramírez, 2023-05-31. The current book focuses on Mora de Castilla *Rubus glaucus* Benth. It explores aspects such as origin, phenology, propagation, floral and fruit morphology, arthropod visitors, pollination mechanisms, propagation methods, chromosome number, fruit development, breeding, morphological diversity and the impact of climate change. It includes novel data about plant phenology, flowering, insect visitors, seed germination, fruit morphology and allometric relationships. This work includes an in depth review of the most recently published information on the topic. Mora de Castilla is an economically important fruit crop from the Andes. It has been crossed with other *Rubus* species due to its high yield and everbearing habit. Currently it is an economically important plant. It has been hybridized with other *Rubus* species producing new and better quality hybrids. This book contains numerous photographs selected by the author to provide the reader with detailed information about the plant's morphological features and arthropod visitors.

*Cultures of Work, the Neoliberal Environment and Music in Higher Education* Sally

Macarthur,Julja Szuster,Paul Watt,2024-03-29 This edited book considers the impact of neoliberalism on music teaching research and scholarship in a higher education context As a subject that bears little resemblance to other university practical disciplines and fares poorly in a model driven by economics the book considers whether musicology is a public good or a threatened species It contemplates what musicology can usefully contribute to a paradigm driven by economics and questions whether it is ever possible to recover an ideal civil subject in neoliberal music academia Contributions investigate what it means to build music research capacity in innovative ways such as forging cross cultural relationships subverting conventional notions of quality and value replacing them with knowledges and values that guide Indigenous intellectual traditions and whether interventions into the legacy of colonialism are truly ever possible in neoliberal higher education institutions that celebrate difference and diversitywhile reinforcing social inequities The book also explores the relationships between gender and music music research training and scholarship and whether the interdisciplinarity championed by the

university is ever workable Finally it undertakes a cross disciplinary new materialist reading of a canonical musical work offering a radically new perspective The book will appeal to students and scholars of music education musicology higher education studies and the creative arts more broadly
