Gilbert, Rein V. Kirss, Natalie Foster, 2013-08-06 The authors who have more than two decades of combined experience teaching an atoms first course have gone beyond reorganizing the topics They emphasize the particulate nature of matter throughout the book in the text art and problems while placing the chemistry in a biological environmental or geological context The authors use a consistent problem solving model and provide students with ample opportunities to practice      *The Science of Why We Exist* Tim Coulson, 2024-07-02 From the Big Bang and the evolution of the genetic code to the birth of consciousness this is the extraordinary story of the chain of events that led to human life on earth Have you ever wondered why you exist What had to happen for you to be alive and conscious Scientists have come a long way in answering this question and this book describes what they have found out It also examines whether our existence was inevitable at the universe s birth 13 77 billion years

ago or whether we are just incredibly lucky The book is aimed at readers who are interested in science but are not experts Written in an entertaining and accessible style the narrative begins by describing how scientists discover facts before taking the reader on a journey from the Big Bang to the creation of the human genome Covering physics astronomy chemistry earth sciences the emergence of life evolution consciousness the rise of humanity and how our personalities are moulded by genes chance and the environment the journey explains how the universe started as point of intense energy that over time in our corner of the universe resulted in our wonderful planet and in you

**A-Level Chemistry** Eileen Ramsden, Ray Barker, Darrel Barsby, Rob Commons, Gez Rizzo, Michala Swales, Ian Wood, J F Rounce, T L Lowe, Joan Sybil Chambers, D J Crawshaw, Brian Jefferson, David Bowles, Eddie Mullan, Garry Wiseman, John Rayneau, Mike Heylings, Rob Wagner, Steve Cavill, Tony Beadsworth, C P Rourke, Mark Gaulter, Brian Gaulter, Robert Smedley, Ian Cook, 2020-10-08 This highly regarded textbook covers all the main A Level Chemistry specifications

*Organic Chemistry* Jonathan Clayden, Nick Greeves, Stuart Warren, 2012-03-15 A first and second year undergraduate organic chemistry textbook specifically geared to British and European courses and those offered in better schools in North America this text emphasises throughout clarity and understanding

**An Introduction to Materials**, 1992 For more than ten years The Science for Conservators Series has provided the key basic texts for conservators throughout the world Scientific concepts are basic to the conservation of artefacts of every type yet many conservators have little or no scientific training These introductory volumes provide non scientists with the essential theoretical background to their work

*The molecular world* The Open University, 2002-01-01 The Molecular World series provides an integrated introduction to all branches of chemistry for both students wishing to specialise and those wishing to gain a broad understanding of chemistry and its relevance to the everyday world and to other areas of science The books with their Case Studies and accompanying multi media interactive CD ROMs will also provide valuable resource material for teachers and lecturers The CD ROMs are designed for use on a PC running Windows 95 98 ME or 2000

**How Molecular Forces and Rotating Planets Create Life** Jan Spitzer, 2021-02-09 A reconceptualization of origins research that exploits a modern understanding of non covalent molecular forces that stabilize living prokaryotic cells Scientific research into the origins of life remains exploratory and speculative Science has no definitive answer to the biggest questions What is life and How did life begin on earth In this book Jan Spitzer reconceptualizes origins research by exploiting a modern understanding of non covalent molecular forces and covalent bond formation a physicochemical approach propounded originally by Linus Pauling and Max Delbr ck Spitzer develops the Pauling Delbr ck premise as a physicochemical jigsaw puzzle that identifies key stages in life s emergence from the formation of first oceans tidal sediments and proto biofilms to progenotes proto cells and the first cellular organisms

**Metals and Chemical Change** David Arthur Johnson, Royal Society of Chemistry (Great Britain), Open University, 2002 This book considers how molecules react and how the feasibility and outcome of chemical reactions can be understood and predicted The activity series of metals is

used as a gateway into a discussion of why some reactions occur and others do not Chemical thermodynamics is then introduced and applied to both inorganic and organic reactions The principles introduced are applied to the chemistry of main group metallic elements sodium potassium magnesium aluminum including industrial uses and biological function An interactive CD ROM accompanies the book This book is part of The Molecular World series which aims to provide a broad foundation in chemistry

**The Age of the Molecule** Royal Society of Chemistry (Great Britain),1999 VHS

**An Introduction to Chemistry** Michael Mosher,Paul Kelter,2023-03-18 This textbook is written to thoroughly cover the topic of introductory chemistry in detail with specific references to examples of topics in common or everyday life It provides a major overview of topics typically found in first year chemistry courses in the USA The textbook is written in a conversational question based format with a well defined problem solving strategy and presented in a way to encourage readers to think like a chemist and to think outside of the box Numerous examples are presented in every chapter to aid students and provide helpful self learning tools The topics are arranged throughout the textbook in a traditional approach to the subject with the primary audience being undergraduate students and advanced high school students of chemistry

*Introducing Biological Energetics* Norman W. H. Cheetham,2010-10-08 This novel interdisciplinary text presents biological understanding in terms of general underlying principles treating energy as the overarching theme and emphasizing the all pervading influence of energy transformation in every process both living and non living Key processes and concepts are explained in turn culminating in a description of the overall functioning and regulation of a living cell The book rounds off the story of life with a brief account of the endosymbiotic origins of eukaryotic cells the development of multicellularity and the emergence of modern plants and animals Multidisciplinary research in science is becoming commonplace However as traditional boundaries start to break down researchers are increasingly aware of the deficiencies in their knowledge of related disciplines Introducing Biological Energetics redresses the reciprocal imbalance in the knowledge levels of physical and biological scientists in particular Its style of presentation and depth of treatment has been carefully designed to unite these two readerships
