Denmark and Germany Bender traces the emergence of care robots in Japan and examines their impact on therapeutic practice around the world Social science scholarship on robotics tends to be either speculative imagining life together with robots or experimental observing robot human interaction in laboratories or through short term field studies Instead Bender follows roboticists developing technologies in Japan and travels with the robots themselves into everyday sites of care tracking the integration of robots into institutional care and the connection of care practice to robotics development By exploring the application of Japanese robotics across the globe *Feeling Machines* highlights the entanglements of therapeutic practice and technological innovation in an age of more than human care     **The Art Amateur** ,1884     *Subject Guide to Books in Print* ,1975     Athenaeum and Literary Chronicle ,1849     Research in Education ,1969
