Nicholas Leibovic,2013-12-11 In recent years several symposia have been held on subjects relating to the general themc of information processing in the nervous system It is now widely recognized that this whole field is rapidly developing and changing in a manner beyond our imaginings of a few years ago When confronted with conceptual revolutions of this kind it is justifiable to have a continued on going discourse and disputation so that there is maximum opportunity for interaction between the leaders of thought in all the re lated disciplines The conference organized by K N Leibovic and held at the State University of New York at Buffalo from Gctober 21st to 24th 1968 made a notable contribution to this interaction It is fortunate that there is here being published not only the papers contributed to the sym posium but also much of the stimulating discussion The term neuronal machinery can be validly used because there is now good understanding of the

operational mechanisms of at least some of the neuronal centers in the brain and our knowledge of these mechanisms is progressing in a most encouraging manner The stated objective by Prof Leibovic the organizer of the symposium was that it was designed to correlate neuronal machinery with psychophysiological phenomena He calls attention to the urgency of achieving a common conceptual basis for neuro anatomy neurophysiology and psychology
