Greater Expectations: Enabling Achievement for Disadvantaged Students Ian Warwick, Alex Crossman, 2024-02-23 How can greater expectations lead to greater outcomes for schools and the students they teach The London Academy of Excellence LAE Newham is one of the leading sixth form schools in the UK The LAE s mission is to combat disadvantage by providing ambitious young people from lower income homes with an education on a par with the best available in the independent sector In its first decade the LAE sent over 1 300 students to Russell Group universities over 200 to medical schools and more than 150 to Oxford or Cambridge Most of those students were the first in their family to attend a university The authors sift through the school s practices to reveal universal concepts and ideas that school leaders in any context can consider for their own schools These ideas include Understanding the curriculum as a source of social mobility Planning for

high quality destinations from first contact with prospective students Exploring challenge strategies to achieve academic excellence across subjects The book culminates in a list of strategies that can drive greater expectations in any school Alex Crossman is Headteacher and Ian Warwick is Chair of the Education Committee at the London Academy of Excellence

Low-Carbon Oriented Improvement Strategy for Flexibility and Resiliency of Multi-Energy Systems Yumin Zhang,Lu Zhang,Rufeng Zhang,Hao Wang,Shuai Yao,2024-09-18 Due to the inherent volatility and randomness the increasing share of energy from renewable resources presents a challenge to the operation of multi energy systems with heterogeneous energy carriers such as electricity heat hydrogen etc These factors will make the systems hard to adjust their supply and demand flexibly to maintain energy balance to ensure reliability Further this hinders the development of a low carbon and economically viable energy system By making full use of the synergistic interaction of generation transmission load demand and energy storage a three fold approach focused on quantifying demand flexibility evaluating supply capabilities and enhancing resilience can unlock the flexibility potential across various sectors of new energy systems This approach provides an effective means of facilitating the transition from conventional energy systems to low carbon clean energy oriented paradigms However huge challenges arising from renewable energy pose great obstacles to the aforementioned solution pathway The main objectives of this Research Topic are 1 Develop advanced carbon emission accounting and measurement techniques for emerging multi energy systems 2 Design effective methods for predicting renewable electricity generation 3 Proposed efficient methods for quantitative assessment of uncertainty from renewables and loads 4 Put forward advanced evaluation optimization and planning strategies incorporating diverse flexibility resources 5 Design multifaceted market mechanisms and collaborative frameworks balancing economics and low carbon footprint 6 Develop operational control and resilience enhancement techniques for distribution networks under large scale distributed energy integration

Everything for Sale? The Marketisation of UK Higher Education Roger Brown, Helen Carasso, 2013-02-11

The marketisation of higher education is a growing worldwide trend. Increasingly, market steering is replacing or supplementing government steering. Tuition fees are being introduced or increased, usually at the expense of state grants to institutions. Grants for student support are being replaced or supplemented by loans. Commercial rankings and league tables to guide student choice are proliferating, with institutions devoting increasing resources to marketing, branding and customer service. The UK is a particularly good example of this, not only because it is a country where marketisation has arguably proceeded furthest, but also because of the variations that exist as Scotland, Wales and Northern Ireland increasingly diverge from England. In *Everything for Sale*, Roger Brown argues that the competitive regime that is now applicable to our Higher Education system was the logical and possibly inevitable outcome of a process that began with the introduction of full cost fees for overseas students in 1980. Through chapters including Markets and Non Markets, The Institutional Pattern of Provision, The Funding of Research, The Funding of Student Education, Quality Assurance, The Impact of Marketisation, Efficiency, diversity and equity, he shows how the evaluation and funding of research, the funding of student education, quality assurance and the structure of the system have increasingly been organised on market or quasi-market lines. As well as helping to explain the evolution of British higher education over the past thirty years, the book contains some important messages about the consequences of introducing or extending market competition in universities' core activities of teaching and research. This timely and comprehensive book is essential reading for all academics at University level and anyone involved in Higher Education policy.
