

Section III: Suspension

Sub-section IV: Tracks

INSTALLATION

All models

Remove the bottom protection.

NOTE: When installing the track, ensure the top angle of bearing surface of the track fits in fitting the hole of wheel.

Track tension & alignment

Track tension and alignment are most critical for the life and wear of your vehicle's suspension. Track tension and alignment must be correct for good vehicle operation.

Track tension (single wheel)

Step:

With one of wheels removed of the vehicle, check the track tension by moving one of track rollers.

All track rollers are connected via roller edge of track and bottom of track frame as shown.

NOTE: Excessive track tension causes excessive power loss and excessive wear on suspension system parts. If too loose, the track will have a tendency to flapping.

Track roller (single suspension)

At the rear of vehicle and connect with a horizontal roller. After the roller is assembled, check that the track runs between front and rear roller, without touching either side and bottom roller of track.
