Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume *History of Continental Philosophy* will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the *History* traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind *A History of Continental Philosophy* has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts *A History of Continental Philosophy* is destined to be the resource of first and last resort for students and scholars alike **Poststructuralism and Critical Theory's Second Generation** Alan D. Schrift, 2014-09-11 *Poststructuralism and Critical Theory's Second Generation* analyses the major themes and developments

in a period that brought continental philosophy to the forefront of scholarship in a variety of humanities and social science disciplines and that set the agenda for philosophical thought on the continent and elsewhere from the 1960s to the present. Focusing on the years 1960-1984, the volume examines the major figures associated with poststructuralism and the second generation of critical theory, the two dominant movements that emerged in the 1960s: Althusser, Foucault, Deleuze, Derrida, Lyotard, Irigaray, and Habermas. Influential thinkers such as Serres, Bourdieu, and Rorty, who are not easily placed in standard histories of the period, are also covered. Beyond these thematic essays, issues as diverse as the Nietzschean legacy, the linguistic turn in continental thinking, the phenomenological inheritance of Gadamer and Ricoeur, the influence of psychoanalysis, the emergence of feminist thought, and a philosophy of sexual difference, the renewal of the critical theory tradition, and the importation of continental philosophy into literary theory.

**'Closing the Gap'** Hans Bertens, 2023-11-20. Postmodern Studies deals with any aspect of postmodernism or of postmodernity and the postmodern in relation to literature. Publications in this series can be either of a theoretical or a more practical, analytic nature. They may refer to any one or to several literary works, genres, or literatures. They may also refer to the other arts, provided the main focus remains literary. In evaluating contributions, the editors of Postmodern Studies will follow no particular methodological or ideological bias. All manuscripts accepted in the series first undergo a process of peer review. Due to rapid developments in literary studies, we close the series for new publications.

*Ursula Le Guin's Earthsea* John Plotz, 2023-04-15. A book on the experience of reading Ursula Le Guin's Earthsea novels. What makes readers fall in love? You might want to start your answer by explaining Ursula Le Guin. She owned John Plotz at age eight, on the overlit and understaffed second floor of the DC library. Four decades later, and who knows how many re-readings later, her Earthsea owns him still. The reasons to love her Earthsea are many. Le Guin sets readers adrift among worlds, peripatetic but somehow at home. She sublimely mixes comfort and revelatory, emancipatory, unsettling. Ursula Le Guin's Earthsea aims to do justice to both.

Le Guin's passionate simplicity and her resonant complexity. Small wonder the inspiration she has been for later speculative writers like Neil Gaiman, Kim Stanley Robinson and N. K. Jemisin. The boldness and coldness of the later three books of *Earthsea* is a revelation. In *Tehanu*, *Tales from Earthsea* and *The Other Wind* she turned a cold eye, a dragon's searching eye back on the comfortable green world she herself had made decades earlier. They unfold a distinctive vision of the writer's task: worldbuilding as responsibility plus openness. Call it invitational realism. She builds a world that leaves the real task of building, of creating, of imagining and of reimagining with her readers. Drawing on his own crooked path from a DC childhood to teaching in Prague to San Francisco journalism to graduate school and then parenthood, Plotz maps the ways that readers young and old find in *Earthsea* a kind of scholar's stone, a delightfully mutable surface that rewards recurrent contemplation.

**British Literature 1640-1789** Robert DeMaria, Jr., 2018-06-18. An indispensable reference for scholars and students of eighteenth-century English literature. This addition to the celebrated Wiley Blackwell Keywords series explores the meanings of fifty-eight of the most important words in British literature of the period 1640-1789. Professor DeMaria focuses on words used with frequency and urgency throughout the works of most major and several minor writers of the British Neoclassical era, with the occasional reach back to the early seventeenth century for a definitive usage found in Francis Bacon, for instance, and look forward to the nineteenth century to the works of Wordsworth, Austen and Keats. Through discussions of words such as atom, economy, humanity, labor, machine, slavery, society and system, he reveals underlying assumptions about the way writers of the period thought about the physical and social world. Likewise, considerations of words such as happiness, passion, truth and virtue shed light on the ethical and moral commitments of the age. Unlike dictionaries and many big data semantics projects, this book brings forth the ambiguities, nuances and ironies that accrued to word usages during the period through a heightened awareness of the contexts in which they occurred. Highlights and exposes the salient cultural and literary debates and metamorphic moments of cultural thought. Reveals an increase in irony and a decrease in allegorical usage as an important trend in the evolution of literary language during the Neoclassical period. Stresses the contexts within which words or phrases appear in order to offer a fuller understanding of their meanings and significance than available from digital databases. Draws upon a vast compilation of sources from one of the most transformative eras of English literature. Rigorous in its scholarship and historical reach. *British Literature 1640-1789: Keywords* is an indispensable resource which scholars and students of British Neoclassical literature will want to keep close at hand. It is certain to become a fixture of most university reference libraries. *Christian Temporalities* Anna-Karina Hermkens, Simon Coleman, Matt Tomlinson, 2024-06-22

This volume explores how different forms of Christianity shape people's visions of pasts and futures and how the transcendent is brought into human time. Beyond conventional discussions around breaks with the past in Christian conversion and future ruptures announced in prophecy, the volume reveals previously unexplored ways in which Christians work with concepts of time and its articulation with divinity, subjectivity, agency and personal, social and political change. By

developing Coleman's argument about historiopraxy in novel directions contributors provide new understandings of religious temporalities and the ritual articulation of immanence and transcendence While building upon previous scholarly work in the anthropology of Christianity this volume pushes the debate further and provides original insights into how religion is mobilised to shape and transform people's pasts presents and futures
