**How Far the Promised Land?** Jonathan Rosenberg, 2018-06-05 How Far the Promised Land explores the relationship between overseas developments and the most important reform movement in modern American history the struggle for racial justice Interweaving civil rights history U S foreign relations history and twentieth century international history the book contributes to the emerging effort to reconceptualize the study of America s past by locating it in a global context In examining the link between international developments and the quest for racial justice Jonathan Rosenberg argues that civil rights leaders were profoundly interested in the world beyond America and incorporated their understanding of overseas matters into their reform program in order to fortify and legitimize the message they presented to their followers the nation and the international community The book considers how a cosmopolitan group of black and white male and female race reform leaders purposively deployed World War I and the peace settlement the decolonization struggles in Africa and Asia the emergence of communism and fascism World War II and the Cold War to help realize their domestic aspirations Rosenberg sets this complex story against the backdrop of America s growing activism on the world stage a development that would have significant positive implications for the domestic struggle Central to the work is the notion that race reform leaders were animated by the idea of color conscious internationalism a distinctive outlook that would affect the trajectory and momentum of the civil rights movement     Nuclear Statecraft Francis J. Gavin, 2012-10-11 We are at a critical juncture in world politics Nuclear strategy and policy have risen to the top of the global policy agenda and issues ranging from a nuclear Iran to the global zero movement are generating sharp debate The historical origins of our contemporary nuclear world are deeply consequential for contemporary policy but it is crucial that decisions are made on the basis of fact rather than myth and misapprehension In *Nuclear Statecraft* Francis J Gavin challenges key elements of the widely accepted narrative about the history of the atomic age and the consequences of the nuclear revolution On the basis of recently declassified documents Gavin reassesses the strategy of flexible response the influence of nuclear weapons during the Berlin Crisis the origins of and motivations for U S nuclear nonproliferation policy and how to assess the nuclear dangers we face today In case after case he finds that we know far less than we think we do about our nuclear history Archival evidence makes it clear that decision makers were more concerned about underlying geopolitical questions than about the strategic dynamic between two nuclear superpowers Gavin s rigorous historical work not only tells us what happened in the past but

also offers a powerful tool to explain how nuclear weapons influence international relations Nuclear Statecraft provides a solid foundation for future policymaking *The Oxford Handbook of European History, 1914-1945* Nicholas Doumanis, 2016

The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards the era was dominated by political violence and chronic instability Its symbols were Verdun Guernica and Auschwitz By the end of this dark period tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized If the nineteenth century gave Europeans cause to regard the future with a sense of optimism the early twentieth century had them anticipating the destruction of civilization The fact that so many revolutions regime changes dictatorships mass killings and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis The Oxford Handbook of European History 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional continental and global developments Readers will find innovative and stimulating chapters on various political social and economic subjects by some of the leading scholars working on modern European history today **Athenaeum**, 1863 **Bulletin**, 1992 Inside the Warsaw Pact, 1992 **Who Wrote the Book of Life?** Lily E. Kay, 2000 This is a detailed history of one of the most important and dramatic episodes in modern science recounted from the novel vantage point of the dawn of the information age and its impact on representations of nature heredity and society Drawing on archives published sources and interviews the author situates work on the genetic code 1953-70 within the history of life science the rise of communication technosciences cybernetics information theory and computers the intersection of molecular biology with cryptanalysis and linguistics and the social history of postwar Europe and the United States Kay draws out the historical specificity in the process by which the central biological problem of DNA based protein synthesis came to be metaphorically represented as an information code and a writing technology and consequently as a book of life This molecular writing and reading is part of the cultural production of the Nuclear Age its power amplified by the centuries old theistic resonance of the book of life metaphor Yet as the author points out these are just metaphors analogies not ontologies Necessary and productive as they have been they have their epistemological limitations Deploying analyses of language cryptology and information theory the author persuasively argues that technically speaking the genetic code is not a code DNA is not a language and the genome is not an information system objections voiced by experts as early as the 1950s Thus her historical reconstruction and analyses also serve as a critique of the new genomic biopower Genomic textuality has become a fact of life a metaphor literalized she claims as human genome projects promise new levels of control over life through the meta level of information control of the word the DNA sequences and its editing and rewriting But the author shows how the humbling limits of these scriptural metaphors also pose a challenge to the

textual and material mastery of the genomic book of life     The Athenaeum ,1856     *1865 TO THE PRESENT A UNITED STATES HISTORY FOR HIGH SCHOOLS* ,1865     **The Last Romantic** William L. O'Neill,1990-09-01 Poet and Journalist Max Eastman is perhaps the most famous example of an American intellectual who during his life moved across the entire political spectrum This reexamination of his career and his place in history reveals the dynamics behind his several careers and political transformations offering new insight into one of the most influential writers of this century It is a model biography of a key intellectual of the twentieth century It is also both a perspective social history of his times and a study in the history of ideas The book will find a welcome place in history literature and political science courses as well as in personal libraries     **Congressional Record** United States. Congress,1962 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873     **The Contentious History of the International Bill of Human Rights** Christopher N. J. Roberts,2015 This book shows how a series of contradictions worked their way into the International Bill of Human Rights
