Supply Chain Management in Agribusiness Prof (Dr) Samarendra Mahapatra, 2022-01-18 Supply Chain is the core business process in an organization that create and deliver a product or service from concept through development and manufacturing or conversion and into a market for consumption Supply chain objectives include cost reduction value addition and reducing response time in profit based organisations in contrast to the non profit based where issues like quality of life equal opportunity literacy rate etc are the priority area In the international market it helps business organisations to provide customer value coordination information sharing to stakeholders and societal value in the educational supply chain with feasible relationships internally as well as externally Better outsourcing enhanced profits customer satisfaction quality outcomes competitive pressure e commerce application globalisation efficient operation and increasing complicity factors require supply chain management Transparency is recognised as the key principle of public procurement policy but

governments do not make public procurement data public Public procurement laws may say what information to publish but not how to publish it Governments may have new procurement laws and e procurement systems but they do not have accessible public procurement data and that is why they do not make it public E procurement systems are difficult to use and require a lot of user training E procurement reforms are frequently unsuccessful and challenging Role of Information Technology in Supply Chain Management It contributes to restructuring the entire distribution set up to reduce inventory costs and achieve higher service levels It reduces lead time monitors transactions and stock levels It helps to maintain a better stockholder relationship and gain a competitive advantage and market sustainability The flow of products information between the chain actors and coordinating activities to manage the supply chain is ensured by IT **Service Parts**
