Beating the Flu J. E. Williams,2006-07-05 Strong medicine Dr Williams offers real world options in the realm of natural and food based therapies Ron Klatz MD DO President of the American Academy of Anti Aging Medicine and author of Infection Protection Be Prepared to Beat the Flu Every year 36 000 Americans die of the flu and one million die worldwide The possibility of a super flu pandemic is frightening If no one has immunity it could cover the globe in 250 days

and conceivably infect twenty percent or more of the world's population of 6.6 billion. The 1918 Spanish flu killed 675,000 Americans and at least fifty million worldwide. The death toll from the bird flu virus with a 50% kill rate in adults and a frightening 89% in children could reach an apocalyptic 360 million. Worse yet without a vaccine or adequate supplies and without enough antiviral drugs, modern medicine doesn't have a specific effective and safe treatment for the flu. This nightmare scenario may not happen but if it does it's essential that individuals and families arm themselves with up to date information. Dr. J. E. Williams is an oriental and natural medicine expert who has used herbs and vitamins to treat influenza and other viruses for more than two decades. In *Beating the Flu* he begins not by telling you how to treat the flu bug but how to avoid it altogether through a combination of good hygiene and super foods that offer the quick boosts your immune system needs to ward off the virus. Should you get sick Dr. Williams also offers a natural medicine cabinet of vitamins, herbs and minerals that work best against any kind of flu along with the clinical evidence to back up the remedies.

Surveillance in the Time of Insecurity Torin Monahan, 2010. Threats of terrorism, natural disaster, identity theft, job loss, illegal immigration and even biblical apocalypse all are perils that trigger alarm in people today. Although there may be a factual basis for many of these fears, they do not simply represent objective conditions. Feelings of insecurity are instilled by politicians and the media and sustained by urban fortification, technological surveillance and economic vulnerability. *Surveillance in the Time of Insecurity* fuses advanced theoretical accounts of state power and neoliberalism with original research from the social settings in which insecurity dynamics play out in the new century. Torin Monahan explores the counterterrorism-themed show 24, Rapture fiction, traffic control centers, security conferences, public housing and gated communities and examines how each manifests complex relationships of inequality, insecurity and surveillance. Alleviating insecurity requires that we confront its mythic dimensions, the politics inherent in new configurations of security provision and the structural obstacles to achieving equality in societies.

Stocks or Stakeholders: The Benefits of Considering Animal Interests Michael D.

Briscoe, 2025-07-10. Animals are typically treated as property in modern societies. *Stocks or Stakeholders* extends stakeholder theories to animals, arguing that full consideration of their interests will benefit humans. For example, one analysis in the book shows that more protected land is associated with fewer animal vehicle collisions, events that currently cost millions of dollars each year and injure both humans and animals. Regardless of how readers personally feel about animals, *Stocks or Stakeholders* makes a compelling case for seriously considering their interests.

The Price of Panic Jay W.

Richards, William M. Briggs, Douglas Axe, 2020-10-13. *WHAT JUST HAPPENED*. The human cost of the emergency response to COVID-19 has far outweighed the benefits. That's the sobering verdict of a trio of scholars: a biologist, a statistician and a philosopher in this comprehensive assessment of the worst panic-induced disaster in history. As the media fanned the flames of panic, government officials and a new elite of scientific experts ignored the established protocols for mitigating a dangerous disease. Instead, they shut down the world economy, closed every school, confined citizens to their homes and

threatened to enforce a regime of extreme social distancing indefinitely And the American public amazingly enough complied without protest Modestly but relentlessly focused on what we know and don't know about the coronavirus Douglas Axe William M Briggs and Jay W Richards demonstrate in this eye opening study what real experts can contribute when a pandemic strikes In the early spring of 2020 the panic of government officials the hysteria of the media and the hubris of suddenly powerful scientists produced a worldwide calamity The Price of Panic is the essential book for understanding what happened and how to avoid repeating our deadly mistakes
