**Contemporary Italian Filmmaking** Manuela Gieri,1995-01-01 Contemporary Italian Filmmaking is an innovative critique of Italian filmmaking in the aftermath of World War II as it moves beyond traditional categories such as genre film and auteur cinema Manuela Gieri demonstrates that Luigi Pirandello s revolutionary concept of humour was integral to the development of a counter tradition in Italian filmmaking that she defines humoristic She delineates a Pirandellian genealogy in Italian cinema literature and culture through her examination of the works of Federico Fellini Ettore Scola and many directors of the new generation such as Nanni Moretti Gabriele Salvatores Maurizio Nichetti and Giuseppe Tornatore A celebrated figure of the theatrical world Luigi Pirandello 1867 1936 is little known beyond Italy for his critical and theoretical writings on cinema and for his screenplays Gieri brings to her reading of Pirandello s work the critical parameters offered by psychoanalysis poststructuralism and postmodernism to develop a syncretic and transcultural vision of the history of Italian cinema She identifies two fundamental trends of development in this tradition the melodramatic imagination and the humoristic or comic imagination With her focus on the humoristic imagination Gieri describes a Pirandellian mode derived from his revolutionary utterances on the cinema and narrative and specifically from his essay on humour L umorismo On Humour 1908 She traces a history of the Pirandellian mode in cinema and investigates its characteristics demonstrating the original nature of Italian filmmaking that is particularly indebted to Pirandello s interpretation of humour     America's role in the world coal export market United States. Cuneo,2021-12-28 Warfare and the circumstances surrounding it have often provided important impulses for cultural production This book explores the relationship between warfare and image making in the early modern period Rather than dealing with images simply as reproductions of actual events the volume demonstrates complex processes by which political national and social identities are negotiated and fashioned in warfare imagery The book analyses three main issues the impact of war on art the ways in which warfare imagery supports dominant ideologies and the manner in which such imagery also constructs alternative identities The essays offer a broad range of methodologies while dealing with a wide array of chronological geographical and artistic materials Historians and art historians will find this volume particularly useful in its nuanced examination of the relationship between art and history     **Wartime Reports** United States.
