

OCR A2 Unit F584: Transport Economics

This unit focuses on the economic principles and context underlying a range of transport problems and issues. It considers transport provision in terms of the models of market structure, especially in the context of contestability in such markets.

Transport, transport trends and the economy

Definition of transport, transport modes and modal characteristics for the movement of passengers and freight.

Transport as a derived demand.

Organisation of transport in the UK.

Market concentration.

Measurement of transport demand and recent trends in the UK. Broad comparisons with trends in the rest of the EU.

Forecasting demand and the economic basis of transport forecasts.

The importance of the transport sector in the UK economy.

Candidates should be able to:

- ☐ define 'transport' in terms of transport operations and infrastructure;
- ☐ understand the advantages and disadvantages of the main modes of transport, for passengers and freight;
- ☐ apply an understanding of these characteristics to appreciate why transport is a derived demand;
- ☐ understand and apply concentration ratios within the transport industry;
- ☐ understand the structure of transport operations in the UK, in terms of private- and public-sector ownership and responsibilities;
- ☐ interpret and understand the reasons for recent trends in the demand for transport in the UK and the rest of the EU;
- ☐ apply economic principles to understand how and why transport forecasts are made and used by economists;
- ☐ discuss the problems and implications of forecasting transport trends;
- ☐ handle and interpret data on the economic importance of transport in the UK economy

Transport Economics , 1980 Transport Economics Colin Grahame Bamford, 1998 Transport Economics provides a comprehensive introduction to this important area of Economics *Transport Economics* C. H. Sharp, 1973 Transport Economics P.C. Stubbs, W.J. Tyson, M.Q. Dalvi, 2017-04-21 Practically everybody in the community uses the transport system and an eighth of personal consumption expenditure in Britain is spent on transport This book first published in 1980 and revised in 1984 presents a synthesis of theoretical and empirical material to explain the elements of transport economics These include demand supply pricing and investment and the importance of institutional arrangements is emphasised in chapters on transport planning and on international transport in which shipping and airline economics are analysed

Principles of Transport Economics Emile Quinet, Roger William Vickerman, 2004 Transport continues to present considerable challenges for both policymakers and economists throughout the world This book provides a rigorous analytical approach to transport economics and transport policy showing how economic principles can be applied to problems and

practical solutions derived As well as providing detailed coverage on the conventional topics of demand costs market structure externalities investment appraisal and regulation the book also examines the wider role of transport in the economy as a whole In addition the authors address the important link between transport and issues of location urban and regional development and economic growth Throughout the book there are frequent references to policy issues at both the national and EU level complemented by a comprehensive discussion on the different ways in which policy has evolved in various European countries The concluding chapter draws together some of the problems encountered in moving from the theories and models developed in the book to the actual implementation of specific policy measures The authors believe that only policies based on a thorough understanding of the economics of transport can help solve some of the pressing problems facing governments across Europe This unique book addresses a wide range of issues and makes use of cutting edge data to provide a set of universal tools to analyse and inform policy at all levels It assumes only a basic knowledge of economics and will be essential reading for students at advanced undergraduate and postgraduate level following courses on transport economics regional science urban studies and geography It will also prove a valuable source of reference for policymakers involved in the provision and regulation of transport and researchers interested in transport planning and policy
