Plastic and Reconstructive Surgery Ross Farhadieh,Neil Bulstrode,Sabrina Cugno,2015-06-02 Plastic and reconstructive surgery continues to evolve as new techniques open up new possibilities for the surgeon In this groundbreaking textbook contemporary approaches are explained and demonstrated to allow trainee and experienced surgeons alike to understand and assimilate best practice Containing over 300 outstanding color figures demonstrating surgical practice an international cast of leading surgeons show the paths to effective plastic surgery technique and outcomes They cover all the major bases including Integument Pediatric Plastic Surgery Head and Neck Reconstruction The Breast Trunk Lower Limb and Sarcomas Upper Limb and Hand Surgery Aesthetic Surgery Comprehensive in scope practical in nature Plastic and Reconstructive Surgery is your one stop guide to successful surgical management of your patients This textbook is aimed at the trainee and young plastic surgeon but it is extremely comprehensive and sufficiently detailed for any practitioner The information is succinct yet complete and up to date For a single volume book the detailed knowledge presented is impressive I think this is a great book It is packed with good and up to date information and I think it will be an invaluable resource for trainees but

also for all plastic surgeons The editors are to be congratulated on achieving a very difficult task with such success from a review by Peter C Neligan MB in Plastic and Reconstructive Surgery This is exactly what the editors of Plastic and reconstructive surgery Approaches and Techniques set out to achieve in producing this excellent textbook It is truly an international effort at all levels as the editors from Australia Ross D Farhadieh the UK Neil W Bulstrode and Canada Sabrina Cugno have joined forces to recruit over 130 international contributors and produce a resource of over 1100 pages that provides a well organized and thorough yet succinct text of the essentials of current plastic surgery Many of the contributors are world renowned experts however there is also a new generation of young rising stars whose contributions are equally good providing a new fresh and contemporary feel from the Foreword by Julian J Pribaz Professor of Surgery Harvard Medical School The authors here have concentrated all this useful information into their chapters in a quite outstanding manner Any plastic surgeon of whatever maturity will find this an excellent purchase which he she will have no reason to regret from a review by Douglas H Harrison in Journal of Plastic Reconstructive Aesthetic Surgery

Matrix Head and Neck Reconstruction Brendan C. Stack Jr.,Mauricio A. Moreno,Jennings R. Boyette,Emre A. Vural,2023-07-25 Head and neck reconstruction can be challenging due to the anatomical complexity of the area its impact upon function and the common need for adjuvant treatment postoperatively in cases of malignancy Furthermore the results are very visible and may significantly affect the patient s ability to reintegrate socially This unique surgical atlas is organized as a matrix of options from simple to complex covering all described anatomical areas of the head and neck The organization of defects and reconstructive options combined with illustrations and high resolution intraoperative photography make this the premier reconstructive reference that will be accessible when difficult reconstructive situations arise The matrix concept is a unique approach to organizing and presenting facial head and neck defects Most clinical cases present as a defect or as the potential for a defect after a resection The matrix approach is a human cognitive approach to problem solving This atlas allows the reader to search out their potential defects and study the possible reconstructive options available to them This spectrum of possibilities may help the surgeon to decide whether to manage on the case on their own or refer it for more expertise It is also a visible tool to assist surgeons in reviewing options and making decisions with patients in the informed consent process The matrix presents defects with internal consistency throughout the text and is organized in an anatomic order Each anatomic sub site is further subdivided into recognized clinical sub units and each potential defect is then illustrated in a standardized fashion to promote clarity and uniformity for easy reference Commonly associated defects are linked Each specific defect is then addressed presenting reconstructive options of increasing complexity with photography to show a staged approach to pre reconstruction site preparation flap selection flap inset and final results acutely post operatively and at a delayed time point Matrix Head and Neck Reconstruction combines and distills the work of major head and neck reconstruction and facial plastic surgery to provide a broad and deep resource that is highly pictorial and practical in
