**Geography, Technology and Instruments of Exploration** Fraser MacDonald, Charles W.J. Withers, 2016-04-22

Focusing on aspects of the functioning of technology and by looking at instruments and at instrumental performance this book addresses the epistemological questions arising from examining the technological bases to geographical exploration and knowledge claims. Questions of geography and exploration and technology are addressed in historical and contemporary context and in different geographical locations and intellectual cultures. The collection brings together scholars in the history of geographical exploration, historians of science, historians of technology and importantly experts with curatorial responsibilities for and museological expertise in major instrument collections. Ranging in their focus from studies of astronomical practice to seismography, meteorological instruments and rockets from radar to the hand held barometer, the chapters of this book examine the ways in which instruments and questions of technology too often overlooked hitherto offer insight into the connections between geography and exploration.

**Food safety, security and sustainability**, 2025-06-08

This Festschrift honors the remarkable career of Prof Dr h c Huub Lelieveld celebrating his 80th birthday and the 20th anniversary of the Global Harmonization Initiative GHI. Spanning a distinguished career across industry, academia and public service, Huub's dedication to excellence, innovation and ethics has profoundly impacted all those who have worked with him, from colleagues at Unilever to members of the GHI. This compilation of research papers contributed by friends and colleagues who have collaborated with Huub explores diverse and significant topics close to his heart. These include the realization of food culture, nutrition, food safety, religious food regulations during times of conflict, food fortification, novel food technologies like irradiation, improving religious slaughter practices, safe cassava consumption and sustainable food futures and environmental responsibility and planetary health. Each article serves as a tribute to his vision and legacy, highlighting his lasting influence on global food science and public health.

*Mobility and Migration Choices* Martin van der Velde, Ton

van Naerssen, 2016-03-03. The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities. This concerns both short distance mobility as well as long distance migration. Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes. This book tests the approach that three crucial thresholds need to be crossed before mobility occurs: the individual's mindset about migrating, the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there. Thus both borders and trajectories can act as thresholds to spatial moves. The threshold approach with its focus on processes affecting whether, when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive, perceive and undertake their transnational journeys. This book examines the three constitutive parts discerned in the cross border mobility decision making process: people, borders and trajectories and their interrelationships.

Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

**2016GUIDELINES FOR INVESTIGATING GEOLOGIC HAZARDS AND PREPARING ENGINEERING-GEOLOGY REPORTS, WITH A SUGGESTED APPROACH TO GEOLOGIC-HAZARD ORDINANCES IN UTAH** Steve D.

Bowman,William R. Lund,2016-09-21 The purpose of these guidelines for investigating geologic hazards and preparing engineering geology reports is to provide recommendations for appropriate minimum investigative techniques standards and report content to ensure adequate geologic site characterization and geologic hazard investigations to protect public safety and facilitate risk reduction Such investigations provide important information on site geologic conditions that may affect or be affected by development as well as the type and severity of geologic hazards at a site and recommend solutions to mitigate the effects and the cost of the hazards both at the time of construction and over the life of the development The accompanying suggested approach to geologic hazard ordinances and school site investigation guidelines are intended as an aid for land use planning and regulation by local Utah jurisdictions and school districts respectively Geologic hazards that are not accounted for in project planning and design often result in additional unforeseen construction and or future

maintenance costs and possible injury or death **Seize the City, Undo the State** Serhiy Kudelia,2025 How do separatist conflicts arise and spread When does separatism become a cover for a foreign aggression How do local communities respond when state institutions collapse and militants take over The armed conflict in Eastern Ukraine which started eight years before Russia s full scale invasion contains unique evidence to address each of these questions In *Seize the City Undo the State* Serhiy Kudelia offers an authoritative study of the conflict at its initial stage 2013 14 based on a meticulous comparison of mobilization dynamics in over dozen towns of Donbas as well as in two major cities outside of it Kharkiv and Odesa Through his extensive travels and numerous interviews with conflict witnesses and participants Kudelia explains how a small group of Russian agents and local militants succeeded in eliminating state control over the largest and most densely urbanized region of Ukraine but failed to do it elsewhere Kudelia challenges the conventional accounts of the armed conflict in Donbas which portray it either as an interstate conflict entirely manufactured by Moscow or as a civil war that broke out without any external influence Instead he argues that local actors prepared ideological and organizational basis for the uprising but the successful spread of separatist control resulted from the covert intervention of Russian agents and widespread collaboration with them of town administrators and community activists His findings also show that when enough members of local communities organized to resist militant takeovers the separatist challenges there quickly dissipated A fine grained and highly original on the ground analysis of the origins of the wider Russian Ukrainian war that broke out in 2022 this book offers broader insights into the conditions under which external intervention may trigger the rise of an armed insurgency in a society torn apart by political and ideological disagreements **Digital DNA** Peter F. Cowhey,Jonathan

**Chinese Foreign Relations with Weak Peripheral States** Jeffrey Reeves, 2015-10-08 This book examines China's relations with its weak peripheral states through the theoretical lens of structural power and structural violence China's foreign policy concepts toward its weak neighbouring states such as the One Belt One Road strategy are premised on the assumption that economic exchange and a commitment to common development are the most effective means of ensuring stability on its borders This book however argues that China's overreliance on economic exchange as the basis for its bilateral relations contains inherently self-defeating qualities that have contributed and can further contribute to instability and insecurity within China's periphery Unequal economic exchange between China and its weak neighbours results in Chinese influence over the state's domestic institutions what this book refers to as structural power Chinese structural power in turn can undermine the state's development contribute to social unrest and exacerbate existing state society tensions what this book refers to as structural violence For China such outcomes lead to instability within its peripheral environment and raise its vulnerability to security threats stemming from nationalism separatism terrorism transnational organised crime and drug trafficking among others This book explores the causality

between China's economically reliant foreign policy and insecurity in its weak peripheral states and considers the implications for China's security environment and foreign policy. This book will be of much interest to students of Chinese politics, Asian security studies, international political economy, and IR in general.

Decolonising Geography? Disciplinary Histories and the End of the British Empire in Africa, 1948-1998 Ruth Craggs, Hannah Neate, 2023-10-16

**DECOLONISING GEOGRAPHY**

This book presents an extraordinarily sensitive account of geography's histories in five African countries subjected to British colonial rule. Craggs and Neate draw together political and imaginative processes of decolonisation through an innovative biographical approach that humanizes and enlivens the story of our academic discipline. It will be an invaluable resource for those seeking a deeper understanding of decolonisation, its recent trajectories, and far-reaching implications on the African continent.

Shari Daya, Affiliate Associate Professor in Environmental and Geographical Science, University of Cape Town.

By placing the experiences, ideas, and practices of African geographers in the center of their analyses, Craggs and Neate provide an unprecedented account of historical and contemporary decolonizing struggles within Geography and the academy. This book should be required reading for all those looking to decolonize the discipline and dislodge it from its Global North histories, institutions, and ideologies.

Mona Domosh, Professor of Geography, The Joan P. and Edward J. Foley Jr. 1933 Professor, Dartmouth College.

This meticulous work explores how colonialism, decolonization, and postcolonialism shaped African geography and geographers. It sheds light on efforts to Africanize the discipline, a process which I was both witness to and a participant in.

Stanley Okafor, Professor of Geography, Retired, University of Ibadan.

How did a generation of academic geographers engage with constitutional decolonisation during the end of the British empire in Africa?

In *Decolonising Geography: Disciplinary Histories and the End of the British Empire in*

Africa 1948 1998 Ruth Craggs and Hannah Neate explore how the teaching research administration and activism of geographers in Africa shaped the discipline and the post colonial geopolitics of the continent The authors follow the professional lives of individual geographers to provide fresh insights into decolonisation in the former British Empire in Africa drawing from extensive archival research and more than 40 oral history interviews with geographers in Ghana Nigeria South Africa Tanzania and the UK Decolonising Geography is a must read for any reader in the UK and Africa with an interest in the relationships between geography and decolonisation
