[A Living History of Immunology](#) Kendall Arthur Smith,2015-11-04 In the highly competitive world of biomedical science often the rush to publish and to be recognized as first with a new discovery concept or method is lost in the hurly burly of the moment as the maddening crowd moves on to the next new thing One of the great things about immunology today is that it has only become mature as a science within the last half century and especially within the past 35 years as a consequence of the revolution of molecular immunology which has taken place only since 1980 Consequently most of those who have contributed to our new understanding of how the immune system functions are still alive and well and still contributing Thus A Living History of Immunology collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology Accordingly this volume combats revisionist science by those who want to alter history by telling the stories a different way than actually happened In this regard one of the good things about science vs other disciplines is that we have the written record of what was done when it was done and by whom Even so we do not have the complete story or narrative of how and why experiments were done and what made the differences that led to success This volume captures and chronicles some of these stories from the past fifty years in immunology

Varieties of Power Marwa Shalaby, 2025-07-08 The introduction of gender quotas has significantly increased women s representation in national legislatures not only in democracies but also in many autocracies To what extent has the growing number of women in authoritarian legislatures granted them more power and influence What conditions help or hinder women s political participation under autocratic regimes And what does the role of women tell us about the politics of authoritarianism today Drawing on a decade of fieldwork and a vast data set collected across the Middle East and North Africa Marwa Shalaby develops a new theory of women s political representation in authoritarian regimes She examines the dynamics of women s political inclusion in three Arab monarchies Morocco Jordan and Kuwait with varying levels of quota implementation and where the strength and capacity of political parties differ widely Shalaby demonstrates that the degree to which individual parties have been institutionalized plays a significant role in women s legislative behavior and political power Parties play integral roles in recruiting cultivating supporting and elevating female candidates in contexts where women have been

excluded from existing networks of power in nondemocratic systems as well as democracies Although the introduction of quota systems has expanded women s numerical presence the absence of institutionalized parties has limited their ability to gain influence Nuanced and incisive Varieties of Power offers grounded comparative insights into the study of gender and politics political representation and authoritarianism in the Middle East and North Africa **Teaching at Its Best** Linda B.
