T. Morris,2017-01-30 This history of the government funded synthetic rubber research program 1942 1956 offers a rare analysis of a cooperative research program geared to the improvement of existing products and the creation of new ones The founders of the program believed the best way to further research in the new field was through collaboration among corporations universities and the federal government Morris concludes that in fact the effort was ultimately a failure and that vigorous competition proves the best way to stimulate innovation Government programs like the rubber research program are far better at improving existing products the author contends than creating wholly new ones **Review of Secondary Waste Disposal Planning for the Blue Grass and Pueblo Chemical Agent Destruction Pilot Plants** National Research Council,Division on Engineering and Physical Sciences,Board on Army Science and Technology,Committee to Review Secondary Waste Disposal and Regulatory Requirements for the Assembled Chemical Weapons Alternatives Program,2008-12-14 The U S Army Program Manager for Assembled Chemical Weapons Alternatives PMACWA is charged with disposing of chemical weapons as stored at two sites Pueblo Colorado and Blue Grass Kentucky In accordance with congressional mandates technologies other than incineration are to be used if they are as safe and as cost effective The weapons are to be disposed of in compliance with the Chemical Weapons Convention Although an element of the U S Army the PMACWA is responsible to the Assistant Secretary

of Defense for Acquisitions Technology and Logistics for completing this mission This book deals with the expected significant quantities of secondary wastes that will be generated during operations of the facilities and their closure While there are only estimates for the waste quantities that will be generated they provide a good basis for planning and developing alternatives for waste disposal while the plants are still in the design phase Establishing efficient disposal options for the secondary wastes can enable more timely and cost effective operation and closure of the facilities
