**Public Administration and Nonprofit Management in Practice** Aimee L. Williamson, Marc Holzer, 2025-10-01 This insightful text edited by two renowned experts provides students of public administration and nonprofit management with a collection of relevant global case studies and corresponding activities. The chapters are structured around common themes and concepts across the field including the foundations of public administration, managing people and administering public services, and improving efficiency and efficacy. The cases, which are derived from countries around the world, focus on building the knowledge, skills, and abilities needed by public and nonprofit administrators globally, providing a much needed supplement to many of the introductory texts in public administration. Each case is contextualized by a short synopsis, reflective questions, references, further reading, and learning activities. The compact case format helps students focus on a specific area of public management, with organization by chapter giving instructors choices among cases and the ability to group related topics. The discussion questions in the cases will develop students' analytical thinking of real scenarios for the application of course content. *Public Administration and Nonprofit Management in Practice* should be used as either core or recommended reading for courses on public and nonprofit management at both the undergraduate and graduate levels, including Master of Public Administration (MPA) courses and related degree programmes. Instructors will find comprehensive teaching notes online to support this case-based approach to learning.

**Fresh Kills** Martin V. Melosi, 2020-01-28 Fresh Kills is a monumental 2,200 acre site on Staten Island that was once the world's largest landfill. From 1948 to 2001, it was the main receptacle for New York City's refuse. After the 9/11 attacks, it reopened briefly to receive human remains and rubble from the destroyed Twin Towers, turning a notorious disposal site into a cemetery. Today, a mammoth reclamation project is transforming the landfill site, constructing an expansive park three times the size of Central Park. Martin V. Melosi provides a comprehensive chronicle of Fresh Kills that

offers new insights into the growth and development of New York City and the relationship among consumption waste and disposal. He traces the metamorphoses of the landscape following it from salt marsh to landfill to cemetery and looks ahead to the future park. By centering the problem of solid waste disposal, Melosi highlights the unwanted consequences of mass consumption. He presents the Fresh Kills space as an embodiment of massive waste linking consumption to the continuing presence of its discards. Melosi also uses the landfill as a lens for understanding Staten Island's history and its relationship with greater New York City. The first book on the history of the iconic landfill, Fresh Kills unites environmental, political, and cultural history to offer a reflection on material culture, consumer practices, and perceptions of value and worthlessness.

*Puberty education & menstrual hygiene management* UNESCO, 2014-04-07      **Regenerative Sanitation** Thammarat Koottatep, Peter Emmanuel Cookey, Chongrak Polprasert, 2019-02-15. This book proposes Regenerative Sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social, ecological, technological, and resource systems. The preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sanitation solutions. It also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration. It explores the contributions to food security, livelihood support, urban regeneration, rural development, and even local economies. A new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented. In addition, is a unique conceptual framework applicable to both developed and developing countries and to all stages, processes, and cycles of delivering sanitation solutions that could critically evaluate, analyse, and provide credible, adequate, and appropriate sanitation solutions. All of which culminates in a strategic and practical application platform called Sanitation 4.0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation of Regenerative Sanitation. A New Paradigm For Sanitation 4.0 is inter- and trans-disciplinary and encourages collaboration between engineers, scientists, technologists, social scientists, and others to provide effective and practical, user-centred solutions. It includes relevant case studies, examples, exercises, and future research recommendations. It is written as both a textbook for researchers and students as well as a practitioners' guide for policymakers and professionals.

Newman,2023-05-26 In *Unmaking Waste* Sarah Newman asks what happens when there are disagreements about what constitutes waste and what one should do with it both at singular moments in time for example when ideas about waste collide in emerging colonial contexts and across time such as between those who left things behind in the past and the archaeologists who recover them Newman examines ancient Mesoamerican understandings of waste Euro American

perceptions of waste in New Spain and early modern European ideals of civility and Christian understandings of good and bad expressed metaphorically through cleanliness and filth These differing perceptions Newman argues demands that we rethink centuries of assumptions imposed on other places times and peoples so long as waste remains a category misunderstood to be common sensical and stable archaeological methods will prove unequal to their task Newman instead proposes anamorphic archaeology an approach that emphasizes the possibility that archaeological objects have multiple physical and conceptual lives *Handbook of Research Methods and Applications in Comparative Policy Analysis* B.
