President's Commission on Model State Drug Laws,1993 **Boys' Life** ,1922-05 Boys Life is the official youth magazine for the Boy Scouts of America Published since 1911 it contains a proven mix of news nature sports history fiction science comics and Scouting *MOUNTAINS AND MINDS* Robert Wheeler,2010-11-12 History and psychology indicate that people have inherent needs for stimulation and challenge meaning and goals social support moral authority explanation of existence and the possibility of transcendence Whether these needs result from physical evolution or intelligent design they produce a

concern about ultimate cause meaning and purpose for existence known as the ontological imperative Since understanding ultimate concerns is beyond physical science elusive and mysterious people tend to attribute explanation to a metaphysical realm resulting in spirituality Mountains symbolize obstacles in meeting the needs and experiences in climbing mountains provide a vehicle both actually and figuratively for exploring associated mechanisms and impacts Pursuit of the ontological imperative stimulates the attitude of spirituality that becomes conceptualized into personal religious systems forming beliefs that can be shared with others Shared religions acquire dogma structure ritual faith and worship that then become institutional religions As science develops physical explanations supplant metaphysical explanations that many times conflict with religion Faith in established belief competes with science producing a great dilemma A great paradox is that both are needed despite the conflict The first chapter relates a personal experience climbing Mount Fuji that nearly ended in disaster with the question of why people do such things Chapter 2 is a brief summary of research supporting the human need of stimulation and challenge Subsequent chapters alternate between mountain climbing experiences and brief summaries of research about why people continue to pursue difficult tasks progressing from stimulation emotions consciousness search for ultimate reality involving ontological imperative spirituality personal religion and institutional religion and finally to pragmatic reality involving science religion dilemma and need for both paradox This bottom up approach leads to the final chapter's proposal for ameliorating conflict and dilemma caused by some religious beliefs by accepting the great paradox and pursuing a seemingly unattainable goal recognizing personal characteristics of spirituality exemplified in the five factor model of personality adopting an attitude of agnosticism whereby the limitations of present knowledge are acknowledged and accepting ecumenical humanism whereby alternate beliefs are tolerated Such an approach might be classified as pragmatic pluralism A basic theme is that for life to be meaningful and manageable people need a sense of purpose and coherence that is best met by having a belief about the unknown and doubt of its validity Contact author at wheelerrj@junio.com
