Checklist of Books and Pamphlets in the Social Sciences New York State Library, 1956 **Reclaiming Authorship** Susan S. Williams, 2013-06-15 There was in the nineteenth century a distinction made between writers and authors Susan S Williams notes the former defined as those who composed primarily from mere experience or observation rather than from the unique genius or imagination of the latter If women were more often cast as writers than authors by the literary establishment there also emerged in magazines advice books fictional accounts and letters a specific model of female authorship one that valorized natural feminine traits such as observation and emphasis on detail while also representing the distance between amateur writing and professional authorship Attending to biographical and cultural contexts and offering fresh readings of literary works *Reclaiming Authorship* focuses on the complex ways writers such as Maria S Cummins Louisa May Alcott Elizabeth Keckley Mary Abigail Dodge Elizabeth Stuart Phelps and Constance Fenimore Woolson put this model of female authorship into practice Williams shows how it sometimes intersected with prevailing notions of male authorship and sometimes diverged from them and how it is often precisely those moments of divergence when authorship was reclaimed by women The current trend to examine women writers rather than authors marks a full rotation of the circle and writers can indeed be the more capacious term embracing producers of everything from letters and diaries to published books Yet certain nineteenth century women made particular efforts to claim the title author Williams demonstrates and we miss something of significance by ignoring their efforts *Subject Guide to Books in Print* ,1991 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1972 *Catalogue of the Books in the Manchester Public Free Library, Reference Department. Prepared by A. Crestadoro. (Vol. II. Comprising the Additions from 1864 to 1879.) [With the "Index of Names and Subjects".]* Public Free Libraries (Manchester), 1864 *The Literary World* ,1878 *The Murray Bookchin Reader* Janet Biehl, Murray Bookchin, 1999 This collection provides an overview of the thought of the foremost social theorist and political philosopher of the libertarian left today Best known for introducing ecology as a concept relevant to radical political thought in the early 1960s Murray Bookchin was the first to propose in the innovative and coherent body of ideas that he has called social ecology that a liberatory society would also have to be an ecological one His writings span five decades and encompass subject matter of remarkable breadth Bookchin s writings on revolutionary philosophy politics and history are far less known than the specific controversies that have surrounded him but deserve far greater attention Despite Bookchin s critical engagement with both Marxism and anarchism his political philosophy known as libertarian municipalism draws on the best of both for the emancipatory tools to build a democratic libertarian alternative His nature philosophy is an organic outlook of generation development and evolution that grounds human beings in natural evolution yet contrary to today s fashionable anti humanism places them firmly at its summit Bookchin s anthropological writings trace the rise of hierarchy and domination out of egalitarian societies while his historical writings cover important chapters in the

European revolutionary tradition Consistent throughout Bookchin's work is a search for ways to replace today's capitalist society which disenchant most of humanity for the benefit of the few and is poisoning the natural world with a more rational and humane alternative The selections in this reader constitute a sampling from the writings of one of the most pivotal thinkers of our era

Critical Essays on William Faulkner Robert W. Hamblin, 2022-08-24 Critical Essays on William Faulkner compiles scholarship by noted Faulkner studies scholar Robert W Hamblin Ranging from 1980 to 2020 the twenty one essays present a variety of approaches to Faulkner's work While acknowledging Faulkner as the quintessential southern writer particularly in his treatment of race the essays examine his work in relation to American and even international contexts The volume includes discussions of Faulkner's techniques and the psychological underpinnings of both the origin and the form of his art explores how his writing is a means of saying no to death examines the intertextual linkages of his fiction with that of other writers like Shakespeare Twain Steinbeck Warren and Salinger treats Faulkner's use of myth and his fondness for the initiation motif and argues that Faulkner's film work in Hollywood is much better and of far greater value than most scholars have acknowledged Taken as a whole Hamblin's essays suggest that Faulkner's overarching themes relate to time and consequent change The history of Faulkner's Yoknapatawpha stretches from the arrival of the white settlers on the Mississippi frontier in the early 1800s to the beginnings of the civil rights movement in the 1940s Caught in this world of continual change that produces a great degree of uncertainty and ambivalence the Faulkner character and reader must weigh the traditions of the past with the demands of the present and the future As Faulkner acknowledges this process of discovery and growth is a difficult and sometimes painful one yet as Hamblin attests to engage in that quest is to realize the very essence of what it means to be human
