Red Palm Weevil Jose Romeno Faleiro, 2021      *Red Palm Weevil: Guidelines on management practices* Food and Agriculture Organization of the United Nations, 2020-02-12 Since gaining a foothold on date palm in the Near East during the mid 1980s the red palm weevil RPW *Rhynchophorus ferrugineus* Olivier has spread rapidly over the last three decades and is now a major pest of palms in a diverse range of agroecosystems worldwide In most of the countries affected failure to manage RPW can be attributed to a lack of awareness about this pest and to lack of systematic and coordinated control actions or management strategies that involve all stakeholders These guidelines have been developed by FAO to support all those involved in the day to day management of RPW in the field including farmers and pest management professionals researchers and the decision makers and administrative stakeholders who support the implementation of integrated pest management IPM strategies for RPW Written by internationally recognized RPW experts the guidelines describe the biology and host range of RPW and address all aspects of RPW IPM including surveillance phytosanitary measures early detection pheromone trapping protocols preventive and curative chemical treatments removal and safe disposal of severely infested palms and best agricultural practices to mitigate attacks by this lethal pest of palms      *Red Palm Weevil* Rabab El-Mergawy, 2014-11-01 Red palm weevil RPW is an invasive species that attacks several palm species Arecaceae causing destructive economic damages It is originated from Southeast Asia and Melanesia due to the commercial exchanges of the offshoots among and within different countries RPW is introduced to other regions It was introduced to the Middle East in the mid 1980 s it is recorded in different localities belonging to Africa Asia Caribbean Europe and the Oceania In order to achieve the RPW management objectives various detection prevention and treatment methods are tested and or applied against RPW Among them there are multi purpose methods that can be used for the three purposes Actually using one method will not give the desired result accordingly all tested methods should be combined in an integrated pest management strategy IPM for best results This book serves as a review of literature book that considers the state and progress of the fundamental and applied research on RPW It addresses large audience such as lecturers undergraduate and graduate students researchers and anyone who is interested to know about RPW      Invasive Species Hamadttu El-Shafie, 2020-09-23 Invasive alien species IAS are a menace to agricultural crops and ornamental plants worldwide due to climate change and global warming They vector serious human and animal diseases and endanger biological diversity through competition and niche displacement This book addresses issues pertaining to introduction pathways of invasive species their bionomics dispersal risk assessment economic impact and possible management and control options It provides comprehensive information on global invasion economic impact and management options for the red palm weevil spotted wing *Drosophila* and the South American tomato pinworm Additionally it examines the economic utilization of invasive plant species from the families Asteraceae and Cactaceae as means of management University teachers and researchers in the fields of entomology

ecology and environment as well as students will find this book useful      **Red Palm Weevil** Rabab El-Mergawy,2015-12-31 This book RED PALM WEEVIL considers the state and progress of the fundamental and applied research on RPW I wrote it to fulfil the increase need of an up to dated multi topics review source on RPW where a review article is not enough for this purpose RED PALM WEEVIL book is intended to be used as a consultation comprehensive review on RPW It is not intended neither to be a methodology source nor a management guide This book addresses lecturers undergraduate and graduate students researchers and anyone who is interested to know about RPW      *Encyclopedia of Entomology* John L. Capinera,2008-08-11 This text brings together fundamental information on insect taxa morphology ecology behavior physiology and genetics Close relatives of insects such as spiders and mites are included      **Molecular Life Of Red Palm Weevil** Rabab A a El-Mergawy,2024-10-31 Red palm weevil RPW is an invasive insect species distributed worldwide infecting different palm species Here a set of phenotypic and genetic characteristics of the red palm weevil are reviewed in Part I Structural biological and ecological characteristics while different approaches to managing the red palm weevil population including molecular approaches are reviewed in Part II      *Area-Wide Control of Insect Pests* M.J.B. Vreysen,A.S. Robinson,J. Hendrichs,2007-10-30 Insect pests are becoming a problem of ever more biblical proportions This new textbook collates a series of selected papers that attempt to address various fundamental components of area wide insect pest control Of special interest are the numerous papers on pilot and operational programs that pay special attention to practical problems encountered during program implementation It s a compilation of more than 60 papers authored by experts from more than 30 countries      **Handbook of Major Palm Pests** Victoria Soroaker,Stefano Colazza,2017-03-06 Handbook of Major Palm Pests Biology and Management contains the most comprehensive and up to date information on the red palm weevil and the palm borer moth two newly emergent invasive palm pests which are adversely affecting palm trees around the world It provides state of the art scientific information on the ecology biology and management of palm pests from a global group of experts in the field An essential compendium for anyone working with or studying palms it is dedicated to the detection eradication and containment of these invasive species which threaten the health and very existence of global palm crops      Genetic Variation and Invasion History of Red Palm Weevil Rabab El-Mergawy,2015-07-01 The Red Palm Weevil RPW is an invasive species that is originated from Southeast Asia it has invaded Middle East and several countries of the Mediterranean Basin Europe Caribbean and United States of America USA during the last three decades El Mergawy 2014 The pest attacks different palm trees causing economic damages where the annual average of date palm damage estimated by 1 9 Zaid 1999 90 % of the attacked palms were lost in Arab peninsula Moore 2000 also the production dropped from 0 7 to 10 tonne hectar Gush 1997 Considering the economic importance of RPW it is necessary to know the history of its invasion and to understand the relationships between the different geographic populations El Mergawy 2014 In this work the genetic variation studies done on different geographic RPW and the genetic relationships between this species and other R species

were reviewed *Potential Invasive Pests of Agricultural Crops* Jorge E. Peña, 2013 Invasive arthropods cause significant damage in agricultural crops and natural environments across the globe Potentially threatened regions need to be prepared to prevent new pests from becoming established Therefore information on pest identity host range geographical distribution biology tools for detection and identification are all essential to researchers and regulatory personnel This book focuses on the most recent invasive pests of agricultural crops in temperate subtropical and tropical areas and on potential invaders discussing their spread biology and control

**Date Palm Genetic Resources and Utilization** Jameel M. Al-Khayri, Shri Mohan Jain, Dennis V. **Wildlife Conservation - Natural and Human-Influenced Ecosystems**, 2025-03-05 This book Wildlife Conservation Natural and Human Influenced Ecosystems gives a very interesting collection of case studies on the current problems challenges and difficulties of this important and scientifically interesting applied ecological research area This is a critical topic because abundant biodiversity enhances ecosystems resilience allowing them to effectively cope with and bounce back from various environmental stresses and disruptions An effective strategy should be based on fundamental principles that cover the duties and obligations of different stakeholders within the wildlife preservation sector including elected and appointed officials conservation experts working in governmental roles trust managers non governmental organizations and the general public I am sure this book will be very useful for everybody researchers teachers students government officials and activists committed to nature protection or others interested in the field who would like to get some insight into this part of the complex phenomena of biodiversity conservation

*The Coconut Palm (Cocos nucifera L.) - Research and Development Perspectives* V. Krishnakumar, P. K. Thampan, M. Achuthan Nair, 2019-02-15 Since the publication of The coconut palm A monograph in 1960 considerable information has been accrued on the crop through work at research institutes international organisations and development agencies Although coconut cultivation is spread over 93 countries providing employment and creating livelihood opportunities to 64 million families around the globe smallholder coconut farmers are now facing numerous challenges The wide gap between the potential and actual yield is a major concern and as such it is necessary to disseminate knowledge in order to implement research findings Coconut research in India one of the leading coconut

producing countries is celebrating its centenary making this an opportune time to review the research and development advances and the relevant technologies This detailed comprehensive book covers all aspects of coconut from the origins to cultivation breeding physiology and value addition as well as subjects of topical interest like nutrition and health biotechnology and climate change and carbon sequestration Written by leading experts in the fields it emphasises that the livelihood of the small coconut landholders is the ultimate aim of scientists and developmental agencies and outlines various important strategies to make coconut farming more remunerative globally It discusses work in all the major coconut growing countries and outlines suggestions for international cooperation Research work on the crop is comparatively difficult because of its perennial nature longevity height long juvenile phase large sized nuts cross pollination and seed propagation As these special features necessitate greater investment of resources time and land it is all the more imperative that research is not duplicated and the information and experience becoming available around the world is shared so that it can be fully utilised In this context periodic publications compiling all the available information on coconut assume greater significance This book is therefore of great value to researchers students extension workers developmental agencies and progressive farmers

Integrated Management of Arthropod Pests and Insect Borne Diseases Aurelio Ciancio, K.G. Mukerji, 2010-06-16 This is the last volume of the IPMD series It aims in a multi disciplinary approach at reviewing and discussing recent advances and achievements in the practice of crop protection and integrated pest and disease management This last effort deals with management of arthropods and is organized with a first section on biological control in citrus orchards a second one on advanced and integrated technologies for insect pest management and a last section dealing with mites and their biological control A wide and exhaustive literature already covers several aspects of chemical or biological control of insects and mites but there is still a need for a more holistic vision of management accounting for different problems and solutions as they are applied or developed in different regions and cropping systems worldwide In this series we attempted to fill this gap providing an informative coverage for a broad range of agricultural systems and situations

Microbial Biocontrol: Food Security and Post Harvest Management Ajay Kumar, 2022-02-23 This second volume of a two volume work reviews beneficial bioactive compounds from various microorganisms such as bacteria fungi cyanobacteria in plant diseases management and the postharvest management of fruits using microbial antagonists Furthermore it reviews the impact of climate change on food security and addressed the legal aspects of microbial biocontrol applications The two volume work Microbial Biocontrol introduces to mechanisms of plant microbe interactions and explores latest strategies of how microbes can be applied in biocontrol and management of plant pathogens replacing chemical fertilizers and pesticides The book covers different groups of microorganisms such as bacteria fungi but also the interplay of entire microbiomes and reviews their specific benefits in crop growth promotion in enhancing the plants tolerance against biotic and abiotic stress as well as in post harvest management of various plant diseases Novel tools such as CRISPR Cas9 and microbe derived nanoparticles are also

addressed besides the legal aspects of biocontrol applications Today rising global population and changing climatic conditions emerge as a major challenge for agronomist farmers and researchers in fulfilling the requirements of global food production The conventional agricultural practices utilize undistributed use of chemical fertilizers and pesticides to enhance growth and yield of agricultural products and fresh foods but their extensive and continuous use have led to a range of negative consequences on the food quality and safety to environment as well as to human and animal health Microbial biocontrol applications are presented as a solution paving the way to a sustainable agriculture in compliance with the UN Sustainable Development Goals SDG The book addresses researchers in academia and agriculture

**The Insects** P. J. Gullan,P. S. Cranston,2014-11-03 Insects represent over half of the planet s biological diversity This popular textbook provides a comprehensive introduction to this extraordinary diversity and places entomology central to the theory and practice of evolutionary and ecological studies Fully revised this fifth edition opens with a chapter concerning the popular side of insect studies including insects in citizen science zoos and butterfly houses and insects as food for humans and animals Key features of insect structure function behaviour ecology and classification are integrated with appropriate molecular studies Much of the book is organized around major biological themes living on the ground in water on plants in colonies and as predators parasites parasitoids and prey insects A strong evolutionary theme is maintained throughout There is major revision to the chapter on systematics and a new chapter Insects in a Changing World includes insect responses to and the consequences of both climate change and human assisted global alterations to distributions Updated Taxoboxes demonstrate topical issues and provide concise information on all aspects of each of the 28 major groupings orders of insects plus the three orders of non insect hexapods New boxes describe a worrying increase in insect threats to landscape and commercial trees including eucalypts palms and coffee and explain the value of genetic data including evolutionary developmental biology and DNA barcoding in insect biodiversity studies The authors maintain the clarity and conciseness of earlier editions and extend the profuse illustrations with new hand drawn figures Over 50 colour photographs together with the informative text and an accompanying website with links to video clips appendices textboxes and further reading lists encourage a deeper scientific study of insects The book is intended as the principal text for students studying entomology as well as a reference text for undergraduate and graduate courses in the fields of ecology agriculture fisheries and forestry palaeontology zoology and medical and veterinary science

**Sustainable Pest Management in Date Palm: Current Status and Emerging Challenges** Waqas Wakil,Jose Romeno Faleiro,Thomas A. Miller,2015-12-21 Date palm *Phoenix dactylifera* L Arecales Arecaceae is an important palm species cultivated in the arid regions of the world since pre historic times and traditionally associated with the life and culture of the people in the Middle East and North Africa which are the pre dominant date palm growing regions worldwide The Food and Agriculture Organization of the UN

estimates that there are over 100 million date palms with an annual production of over 7.5 million tonnes. A recent report on the arthropod fauna of date palm enlists 112 species of insects and mites associated with date palm worldwide including 22 species attacking stored dates. Enhanced monoculture of date palm in several date palm growing countries coupled with climate change, unrestrained use of chemical insecticides and extensive international trade is likely to impact the pest complex and the related natural enemies in the date agro ecosystems. In view of the importance of date palm as an emerging crop of the future and the need to develop and deploy ecologically sound and socially acceptable IPM techniques, this book aims to comprehensively address issues related to the biology and sustainable management of major insect and mite pests of date palm by assessing the current IPM strategies available besides addressing emerging challenges and future research priorities. The issues pertaining to the role of semiochemicals in date palm IPM involving new strategies revolving around attract and kill and push pull technologies, phytoplasmas and their insect vectors with implications for date palm, innovative methods for managing storage pests of dates and knowledge gaps in devising sustainable strategies for the management of red palm weevil *Rhynchophorus ferrugineus* Olivier are also addressed.

*Insects as food and feed: From production to consumption* Arnold Van Huis, Jeffrey Tomberlin, 2017-09-15

Alternative protein sources are urgently required as the available land area is not sufficient to satisfy the growing demand for meat. Insects have a high potential of becoming a new sector in the food and feed industry mainly because of the many environmental benefits when compared to meat production. This will be outlined in the book as well as the whole process from rearing to marketing. The rearing involves large scale and small scale production facility design, the management of diseases and how to assure that the insects will be of high quality genetics. The nutrient content of insects will be discussed and how this is influenced by life stage, diet, the environment and processing. Technological processing requires decontamination, preservation and ensuring microbial safety. The prevention of health risks e.g. allergies will be discussed as well as labelling, certification and legislative frameworks. Additional issues are insect welfare, the creation of an enabling environment, how to deal with consumers, gastronomy and marketing strategies. Examples of production systems will be given both from the tropics: palm weevils, grasshoppers, crickets and from temperate zones: black soldier flies and house flies as feed and mealworms and crickets as food. Detailed photographs are shown at the beginning of each section and chapter.
