

# **Separation of a Mixture – Methods**

**Mixtures can be separated into separate parts using many methods:**

**Magnets** – Separate certain **metals** from **non-metals**.  
Magnetic metals include **iron, nickel, and cobalt**.

**Filtration** – Separates **solid substances** from **liquids**.  
Usually done using **filter paper** or another type of filter.

**Evaporation** – Separates **solid substances** from **liquids**.  
The liquid (water) is boiled, leaving solid particles behind.

**Chromatography** – Separates **liquid substances** based on differences of **solubility in water** (ability of a substance to dissolve in water).

**Distillation** – Separates **liquids** on differences in their **boiling points**.  
One substance is boiled while the other liquid substance remains.

In distillation, the mixture of liquids begins in an initial flask. It is heated until one of the liquids evaporates away. The gaseous substance is then cooled and returns to the second flask as a liquid.

**Ion-Exchange Membrane Separation Processes** H Strathmann,2004-01-29 Today membranes and membrane processes are used as efficient tools for the separation of liquid mixtures or gases in the chemical and biomedical industry in water desalination and wastewater purification Despite the fact that various membrane processes like reverse osmosis are described in great detail in a number of books processes involving ion exchange membranes are only described in a fragmented way in scientific journals and patents even though large industrial applications like electrodialysis have been around for over half a century Therefore this book is emphasizing on the most relevant aspects of ion exchange membranes This book provides a comprehensive overview of ion exchange membrane separation processes covering the fundamentals as well as recent developments of the different products and processes and their applications The audience for this book is heterogeneous as it includes plant managers and process engineers as well as research scientists and graduate students The separate chapters are based on different topics The first chapter describes the relevant Electromembrane processes in a general overview The second chapter explains thermodynamic and physicochemical fundamentals The third chapter gives information about ion exchange membrane preparation techniques while the fourth and fifth chapter discusses the processes as unit operations giving examples for the design of specific plants First work on the principles and applications of electrodialysis and related separation processes Presently no other comprehensive work that can serve as both reference work and text book is available Book is suited for teaching students and as source for detailed information *Interactive Science Practical Book 1A Special/ Express/ Normal (Academic)* ,2001 **Learning Elementary Science for Class 6** V.K. Sally,S.K. Aggarwal,Goyal Brothers Prakashan,2020-04-01 Goyal Brothers Prakashan Industrial Chemical Separation Timothy C. Frank,Bruce S. Holden,2023-08-07 A fresh new treatment written by industry insiders this work gives readers a remarkably clear view into the world of chemical separation The authors review distillation extraction adsorption crystallization and the use of membranes providing historical perspective explaining key features and offering insights from personal experience The book is for engineers and chemists with current or future responsibility for chemical separation on a commercial scale in its design operation or improvement or for anyone wanting to learn more about chemical separation from an industrial point of view The result is a compelling survey of popular technologies and the profession one that brings the art and craft of chemical separation to life Ever wonder how popular separation technologies came about how a particular process functions or how mass transfer units differ from theoretical stages Or perhaps you want some pointers on how to begin solving a separation problem You will find clear explanations and valuable insights into these and other aspects of industrial practice in this refreshing new survey Exploring Science Book for Class 6 V.K.
