Clyde Soles, 2014-04-01 As climate change continues to wreak havoc on the environment devastating wildfires both natural and manmade are increasing The figure for average acres burned has increased from almost 2 million acres in 1992 to nearly 7 million in 2012 which set a new record with an average of 165 acres burned per fire Things are heating up but global warming isn't the only problem Budgets for fire suppression have been slashed severely The number of air tankers has decreased from 44 in 2002 to just 9 in 2012 which means fast attacks on fledgling fires will grow more difficult in the future If you live in a wildland urban interface the zone between unoccupied and developed land sooner or later fire will happen Fortunately you can prepare for the worst and it doesn't have to cost a fortune This highly detailed and practical reference guide will help you live more safely in the red zone and save you time and money along the way providing multiple methods of risk mitigation along with the financial level of each action Effectively prepping your land can even enhance the scenery and increase the value of your home Learn how wildfires begin and behave how to evaluate your property what essential tools you'll need and what they will cost how to prepare your land and home including tips on how to avoid insurance nightmares when to stay and fight when it's time to evacuate how to clean up after a fire event and more Even if you live in the middle of a suburb the information on how fires start and spread and how to deal with insurance claims will prove enlightening and helpful No one can guarantee that your house or land will survive if a major conflagration erupts but you can greatly improve your odds with this book and a little preparation **Log Construction Manual** Robert Wood

Chambers, 2003 Log buildings are embedded deeply into North American history and culture For more than one thousand years builders have been weaving logs into homes shelters barns and churches Today however the buildings where we live and work are rarely handmade from natural materials In this context handcrafted scribe fitted natural log buildings are an attractive and uplifting alternative to conventional buildings and building materials This book tells you what you need to know to build your own log home and also reveals the deep rhythms and patterns of log construction Author Robert Chambers shows how to take naturally shaped tapered round logs and scribe fit them one to another so that they look like they actually grew together in the woods The Log Construction Manual is filled with information available nowhere else

including the Log Selection Rules Chambers's brilliantly simple method for choosing which log to use next instructions for building hip and valley log rafters and roof trusses from full round logs step by step directions for laying out the sill logs for virtually any floor plan including hexagons prows and more state of the art compression fit saddle notches and underscribing to keep fits tight over time details on scribing and cutting long grooves and corner notches just like the pros and more Chambers also offers advice on organizing and financing a log home project and has loads of experience to share on cutting costs and avoiding common pitfalls He presents practical ideas for saving money and controlling costs Although handcrafted log homes are expensive to buy they are within reach for many as owner managed building projects Written concisely with great care in explaining important details the Log Construction Manual brings clarity insight depth and even humor to the log builder's craft This is a comprehensive book for log home owner builders beginners as well as professionals
