**evaluation of the project "Disposal of obsolete pesticides including persistent organic pesticides, promotion of alternatives and strengthening pesticides management in the Caribbean"** Food and Agriculture Organization of the United Nations, 2021-12-07 Caribbean nations in particular SIDS have been traditionally vulnerable to the entry of potentially harmful unregistered and unregulated pesticides. In many of these countries the legislation and regulations for managing pesticides are fragmented and at various stages of development. Under the overall objective to promote sound management of pesticides in the Caribbean the project kick started various activities covering pesticide life cycle management in the region, drafted a regional model pesticide legislation and facilitated different vital elements. It specifically contributed to the collection and shipment of obsolete pesticides 319 tonnes from all 11 project countries and polychlorinated biphenyls 54 tonnes from four countries. However, it has not been able to successfully replicate, scale up nationally and build capacities with government stakeholders evenly across all countries. Further follow up and support are required to ensure sustainability and impact in the region and the project countries and thus the engagement of the private sector and civil society organizations will be critical.

*Federal Information Sources & Systems*, Catalog of Federal Domestic Assistance, 1991. Identifies and describes specific government assistance opportunities such as loans, grants, counseling and procurement contracts available under many agencies and programs.

*Baseline survey final report: Aquaculture for income and nutrition project*, The World Fish Center in collaboration with the GOB and USAID has been implementing the FtF Aquaculture Project since October 2011 with a view to meet the government and FtF goals to sustainably reduce poverty and hunger. The project is funded by the USAID FtF initiative and covers a 5 year intervention in aquaculture focused on 20 southern districts in the country. The project has four major objectives: a dissemination of improved quality fish and shrimp seed, b improving the nutrition and income status of farm households, c increasing investment employment and fish production through commercial aquaculture and d policy and regulatory reform and institutional capacity building to support sustainable aquaculture growth.

Project Management Information Systems: Empowering Decision Making and Execution Mohamed A. Ismail, Sherif, 2025-03-20. Project management information systems (PMIS) empower decision making and enhance the execution of projects by providing real time access to key data and tools for effective planning, monitoring and control. These systems integrate various functions such as scheduling, budgeting, resource allocation and risk management into a centralized platform enabling project managers and teams to make informed decisions quickly and efficiently. By streamlining communication and collaboration, PMIS reduces the risk of delays, cost overruns and miscommunications and the data insights offered allow for better forecasting, performance tracking and continuous improvement throughout the project lifecycle. PMIS transforms the way projects are managed ensuring they are delivered on time, stay on budget and provide good results. Project Management Information Systems: Empowering Decision Making and Execution explores how project management information systems (PMIS) facilitate effective decision making and project execution by providing
