Stone Cleaning A Guide For Practitioners:

Stone Cleaning Christopher Andrew, Maureen Young, Kenneth H. Tonge, 1994 **Stone Conservation** Clifford A. Price, Eric Doehne, 2011-02-15 First published in 1996 this volume has been substantially updated to reflect new research in the conservation of stone monuments sculpture and archaeological sites Handbook of Polymers in Stone Conservation Elisabetta Princi, 2014-11-20 This handbook is dedicated to the conservation of stone materials by the application of polymers A short introduction on polymer chemistry is given to highlight their characteristics and properties After the physical and chemical attributes of stone are summarised the problems related to its degradation are discussed Finally the properties of the various polymers of potential value for stone restoration are reviewed and classified by schemes and tables and pointers for the future are suggested This handbook will be of great interest to those who share the author's enthusiasm for stone artworks and her dedication to their restoration and conservation **Stone Decay** B.J. Smith, A. Turkington, 2016-01-08 This volume offers valuable insights into the nature of decay processes and the factors that control them It presents several studies on the impact of pollution on stonework in urban environments Important methodological contributions cover the mapping of facades to explain rates of decay associated with conservation actions the laboratory simulation of corrosion in polluted atmospheres the quantification of colour change through a study of the artificial ageing of building stone The effectiveness of stone treatments within the laboratory is also considered **Prevention of Premature Staining in New Buildings** Phil Parnham, 2002-11-01 The appearance of ugly staining early in a building's life ruins an otherwise pleasing appearance tarnishes the image of the owners and gives rise to costly refurbishment works In this book Phil Parnham raises a number of questions that should be considered whenever a new building is being designed or built These are why has staining become so prominent what causes premature staining which parts of new buildings are likely to be affected how can it be avoided By using a number of highly illustrated case studies the author answers these questions and ends by suggesting measures that should be taken by all design and construction professionals to prevent premature staining Building Pathology David S. Watt, 2009-05-12 Building pathology provides an interdisciplinary approach to the study of defects and performance in order to develop appropriate remedial and management solutions It considers how the structure and materials of a building relate to its environment its occupants and the way the building is used so as to develop a better understanding of building failures This book provides a well illustrated introduction to the discipline of building pathology bridging the gap between current approaches to the surveying of buildings and the detailed study of defect diagnosis prognosis and remediation It features a number of case studies and a detailed set of references and further reading This second edition has been updated to reflect changes in legislation guidance and construction and provides new case studies that demonstrate the breadth and depth of the subject *Cleaning Techniques in Conservation Practice* Norman R. Weiss, Kyle C. Normandin, Deborah Slaton, 2015-12-08 This book is being simultaneously published as a special issue of the

Journal of Architectural Conservation and presents the very latest research and developments in the cleaning of buildings sculpture and monuments It covers both wet and dry micro abrasive systems other types of abrasives laser cleaning methods and proprietary poultices for specialized applications The material presented is supported by case study examples from an international selection of major buildings and monuments where the techniques have recently been tried and tested
