Trust Management In Cloud Services:

Trust Management in Cloud Services Talal H. Noor, Quan Z. Sheng, Athman Bouguettaya, 2014-11-14 This book describes the design and implementation of Cloud Armor a novel approach for credibility based trust management and automatic discovery of cloud services in distributed and highly dynamic environments This book also helps cloud users to understand the difficulties of establishing trust in cloud computing and the best criteria for selecting a service cloud The techniques have been validated by a prototype system implementation and experimental studies using a collection of real world trust feedbacks on cloud services The authors present the design and implementation of a novel protocol that preserves the consumers privacy an adaptive and robust credibility model a scalable availability model that relies on a decentralized architecture and a cloud service crawler engine for automatic cloud services discovery This book also analyzes results from a performance study on a number of open research issues for trust management in cloud environments including distribution of providers geographic location and languages These open research issues illustrate both an overview of the current state of cloud computing and potential future directions for the field Trust Management in Cloud Services contains both theoretical and applied computing research making it an ideal reference or secondary text book to both academic and industry professionals interested in cloud services Advanced level students in computer science and electrical engineering will also find the content valuable

Trust Management in Mobile Environments: Autonomic and Usable Models Yan, Zheng, 2013-11-30 This book explores current advances in digital and mobile computing technologies from the user perspective evaluating trust models and autonomic trust management covering the recent history of trust in digital environments to prospective future developments Provided by publisher

Credibility-based Trust Management and Discovery of Cloud Services Talal Hashem Noor, 2013 Cloud computing is gaining a considerable momentum as a new computing paradigm for providing flexible and on demand infrastructures platforms and software as services The trust management of services issues attracted many researchers in the past years However in cloud computing with the highly dynamic distributed and non transparent nature of cloud services this research area has gained a considerable significance Robust trust management approaches will be essential in establishing trust between cloud service consumers and providers and will significantly contribute to the adoption and growth of cloud computing In this dissertation we present a novel approach for credibility based trust management and automatic discovery of cloud services in distributed and highly dynamic environments We first propose a Zero Knowledge Credibility Proof Protocol to prove the credibility of consumers feedback without breaching consumers privacy We then propose an adaptive and robust Credibility Model for assessing the consumers credibility in giving feedback to cloud services To measure how experienced a consumer would be we use the concepts of Consumer Capability and Majority Consensus We further introduce the concepts of Feedback Density and Occasional Feedback Collusion to detect strategic and occasional behaviors of collusion attacks To detect Sybil attacks we introduce the

concepts of Multi Identity Recognition and Occasional Sybil Attacks To adjust trust results for cloud services that have been affected by malicious behaviors we introduce the concept of Change Rate of Trust We then propose a scalable Availability Model to manage the availability of the decentralized implementation of the trust management service To share the workload between the trust management service nodes we use the concept of load balancing thereby always maintaining a desired availability level We introduce the concept of operational power to determine the optimal number of nodes and exploit particle filtering to precisely predict the availability of each node and determine the optimal number of replicas for each node The techniques presented in this dissertation are implemented in Cloud Armor a prototype that provides a set of functionalities to deliver Trust as a Service TaaS Finally we conduct extensive experimental and performance studies of the proposed techniques using a collection of real world trust feedbacks on cloud services We particularly develop a Cloud Service Crawler Engine for cloud services collection The collected datasets include meta data of nearly 6 000 real world cloud services 1 06GB The experimental results shows that our system i is able to effectively distinguish between feedbacks from experienced and amateur consumers ii is more adaptive and robust in trust calculations by effectively detecting collusion and Sybil attacks without breaching consumers privacy no matter attacks occur in a strategic or occasional behavior iii is more scalable and maintains a desired availability level in highly dynamic environments and iv provides an efficient support for identifying collecting validating categorizing and recommending cloud services based on trust

Trust & Fault in Multi Layered Cloud Computing Architecture Punit Gupta, Pradeep Kumar Gupta, 2020-01-20 This book discusses various aspects of cloud computing in which trust and fault tolerance models are included in a multilayered cloud architecture The authors present a variety of trust and fault models used in the cloud comparing them based on their functionality and the layer in the cloud to which they respond Various methods are discussed that can improve the performance of cloud architectures in terms of trust and fault tolerance while providing better performance and quality of service to user The discussion also includes new algorithms that overcome drawbacks of existing methods using a performance matrix for each functionality This book provide readers with an overview of cloud computing and how trust and faults in cloud datacenters affects the performance and quality of service assured to the users Discusses fundamental issues related to trust and fault tolerance in Cloud Computing Describes trust and fault management techniques in multi layered cloud architecture to improve security reliability and performance of the system Includes methods to enhance power efficiency and network efficiency using trust and fault based resource allocation

Advanced Web Services Athman Bouguettaya, Quan Z. Sheng, Florian Daniel, 2013-08-13 Web services and Service Oriented Computing SOC have become thriving areas of academic research joint university industry research projects and novel IT products on the market SOC is the computing paradigm that uses Web services as building blocks for the engineering of composite distributed applications out of the reusable application logic encapsulated by Web services Web services could be considered the best known and

most standardized technology in use today for distributed computing over the Internet This book is the second installment of a two book collection covering the state of the art of both theoretical and practical aspects of Web services and SOC research and deployments Advanced Web Services specifically focuses on advanced topics of Web services and SOC and covers topics including Web services transactions security and trust Web service management real world case studies and novel perspectives and future directions The editors present foundational topics in the first book of the collection Web Services Foundations Springer 2013 Together both books comprise approximately 1400 pages and are the result of an enormous community effort that involved more than 100 authors comprising the world s leading experts in this field Developing and Securing the Cloud Bhavani Thuraisingham,2013-10-28 Although the use of cloud computing platforms and applications has expanded rapidly most books on the subject focus on high level concepts There has long been a need for a book that provides detailed guidance on how to develop secure clouds Filling this void Developing and Securing the Cloud provides a comprehensive overview of cloud computing t **Service-Oriented Computing - ICSOC Workshops 2012** Aditya Ghose,Huibiao Zhu,Qi Yu,Alex Delis,Quan Z. Sheng,Olivier Perrin,Jianmin Wang,Yan Wang,2013-04-11 This book constitutes the thoroughly refereed proceedings of the 2012 ICSOC Workshops consisting of 6 scientific satellite events organized in 3 main tracks including workshop track ASC DISA PAASC SCEB SeMaPS and WESOA 2012 PhD symposium track demonstration track held in conjunction with the 10th International Conference on Service Oriented Computing ICSOC in Shanghai China November 2012 The 53 revised papers presents a wide range of topics that fall into the general area of service computing such as business process management distributed systems computer networks wireless and mobile computing grid computing networking service science management science and software engineering Service Oriented Computing Gerti Kappel,Zakaria Maamar,Hamid R. Motahari-Nezhad,2011-11-29 This book constitutes the refereed proceedings of the 9th International Conference on Service Oriented Computing ICSOC 2011 held in Paphos Cyprus in December 2011 The 54 revised papers presented were carefully reviewed and selected from 184 submissions The papers are organized in topical sections on business process modeling quality of service formal methods XaaS computing service discovery service security and trust service runtime infrastructures and service applications *Advances in Mobile Cloud Computing and Big Data in the 5G Era* Constandinos X. Mavromoustakis,George Mastorakis,Ciprian Dobre,2016-11-19 This book reports on the latest advances on the theories practices standards and strategies that are related to the modern technology paradigms the Mobile Cloud computing MCC and Big Data as the pillars and their association with the emerging 5G mobile networks The book includes 15 rigorously refereed chapters written by leading international researchers providing the readers with technical and scientific information about various aspects of Big Data and Mobile Cloud Computing from basic concepts to advanced findings reporting the state of the art on Big Data management It demonstrates and discusses methods and practices to improve multi source Big Data manipulation techniques as well as the integration of

resources availability through the 3As Anywhere Anything Anytime paradigm using the 5G access technologies *Trust Management VI* Theo Dimitrakos, Rajat Moona, Dhiren Patel, D. Harrison McKnight, 2012-05-17 This book constitutes the refereed proceedings of the 6th IFIP WG 11.11 International Conference IFIPTM 2012 held in Surat India in May 2012. The 12 revised full papers presented together with 8 short papers and the abstracts of 4 keynote talks were carefully reviewed and selected from 51 submissions. Building on the traditions inherited from the iTrust and previous IFIPTM conferences, IFIPTM 2012 is a multi-disciplinary conference focusing on areas such as trust models, social, economic and behavioural aspects of trust, trust in networks, mobile systems and cloud computation, privacy, reputation systems and identity management. *Cloud Security: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2019-04-01 Cloud computing has experienced explosive growth and is expected to continue to rise in popularity as new services and applications become available. As with any new technology, security issues continue to be a concern, and developing effective methods to protect sensitive information and data on the cloud is imperative. *Cloud Security: Concepts, Methodologies, Tools, and Applications* explores the difficulties and challenges of securing user data and information on cloud platforms. It also examines the current approaches to cloud-based technologies and assesses the possibilities for future advancements in this field. Highlighting a range of topics such as cloud forensics, information privacy and standardization and security in the cloud, this multi-volume book is ideally designed for IT specialists, web designers, computer engineers, software developers, academicians, researchers and graduate-level students interested in cloud computing concepts and security.

Trust Management IX Christian Damsgaard Jensen, Stephen Marsh, Theo Dimitrakos, Yuko Murayama, 2015-04-29 This book constitutes the refereed proceedings of the 9th IFIP WG 11.11 International Conference on Trust Management IFIPTM 2015 held in Hamburg, Germany in May 2015. The 10 revised full papers and 5 short papers presented were carefully reviewed and selected from 28 submissions. In addition, the book contains one invited paper and 5 papers from a special session on trusted cloud ecosystems. The papers cover a wide range of topics including trust and reputation and models thereof, the relationship between trust and security, socio-technical aspects of trust, reputation and privacy, trust in the cloud and behavioural models of trust. *Cloud Computing* Dinesh G. Harkut, Kashmira Kasat, Saurabh Shah, 2019-01-03 In the era of the Internet of Things and Big Data, Cloud Computing has recently emerged as one of the latest buzzwords in the computing industry. It is the latest evolution of computing where IT resources are offered as services. Cloud computing provides on-demand, scalable, device-independent and reliable services to its users. The exponential growth of digital data, bundled with the needs of analysis, processing and storage, and cloud computing has paved the way for a cheap, secure and omnipresent computing framework allowing for the delivery of enormous computing and storage capacity to a diverse community of end recipients. Clouds are distributed technology platforms that leverage sophisticated technology innovations to provide highly scalable and resilient environments that can be remotely utilized by organizations in a multitude of

powerful ways The term cloud is often used as a metaphor for the Internet and can be defined as a new type of utility computing that basically uses servers that have been made available to third parties via the Internet **Trust**
