Bewley, 2010-04 Killer Cure will change forever how you think about your health and health care Leaving conventional wisdom in the dust Killer Cure reveals startling and unforgettable insights Why health care in America accidentally kills 12 000 people each week even though every doctor and nurse you know is terrific Why health care's hidden assumptions about you are almost certain to damage your health and what you can do about it Why health care's focus on solving yesterday's problems may reduce life expectancy in the U S by as much as five years Why you might want to become CEO of your own health and health care and how to go about it The root cause of America's health care crisis is that health care is not about you Health care is not designed to help you enjoy good health It is designed to help doctors take action write prescriptions perform surgery etc That focus hurts you in two ways First those actions are likely to damage you nearly as often as they help you because of side effects complications and other problems with care delivery For example hospital ICUs Intensive Care Units have a remarkable number of characteristics in common with prison camps for terrorist suspects People die needless deaths as a result Second the focus on actions the doctor takes crowds out actions you could take that would often get you better outcomes For example more than 100 000 people a year get a foot or leg amputated instead of learning simple ways to prevent foot infections in the first place To get better results the health care system first needs to embrace a new purpose to enable people to lead the lives they want Three further changes are necessary The first is a social revolution akin to freeing the slaves or granting women the right to vote With this revolution the health care system will no longer treat the people it serves as if they were second class citizens whose intelligence values priorities and needs can safely be ignored while others call the shots The second is more realistic expectations about what health care can deliver The third is management of health care as a process connecting the dots among actions that are uncoordinated today Killer Cure provides a tool kit to help you safeguard your life until these changes take place Before closing the book makes surprising predictions concerning a future in which health care is about you At the end of Killer Cure is a Readers Discussion Guide It is offered to aid you in thinking about and discussing both the book and your own health care experiences      Architecture Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always

tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic *Brodsky Translating Brodsky: Poetry in Self-Translation* Alexandra Berlina,2014-04-24 Winner of the Anna Balakian Prize 2016 Is poetry lost in translation or is it perhaps the other way around Is it found Gained Won What happens when a poet decides to give his favorite Russian poems a new life in English Are the new texts shadows twins or doppelgangers of their originals or are they something completely different Does the poet resurrect himself from the death of the author by reinterpreting his own work in another language or does he turn into a monster a bilingual bicultural centaur Alexandra Berlina herself a poetry translator and a 2012 Barnstone Translation Prize laureate addresses these questions in this new study of Joseph Brodsky whose Nobel prize winning work has never yet been discussed from this perspective
