## **Tupolev Tu 128 Fiddler:**

*Tupolev Tu-128 'Fiddler'* Alan Dawes, Nikolai Popov, Sergey Burdin, 2014 The first comprehensive account in English of the development and operation of Russia's least known postwar jet fighter. Only ever operated over the former Soviet Union's vast northern territory by an elite group of Soviet Air Force aircrew, it was little known even to most Russian military personnel and the majority of Soviet citizens. Although never flown in anger, the Tu 128 played a hugely important part in protecting the nation's Arctic approaches against foreign incursions for almost a quarter of a century. The reader will discover the rationale behind its selection and training of aircrew, operation of quick reaction alerts, manual and automated ground controlled intercepts and cooperation with the Soviet Union's first AWACS, its stable mate the Tu 126 Moss. With numerous previously unpublished photographs, diagrams and expert text, the Tu 128 Fiddler will prove indispensable to enthusiasts and historians alike. **from jacket cover**

**Tupolev TU-22** Sergey Burdin, 2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961. It remained in service until replaced by the much modified Tu 22M Backfire, which was introduced in the early 1970s and still remains in service. It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role, carrying either conventional or nuclear bombs. The early aircraft had a range of 1,800 miles, but later models had a much increased radius of action through the introduction of in-flight refuelling. This book looks at the design and development of the aircraft up to the introduction of the type M Backfire. Details of construction, weapon systems, photo reconnaissance and jamming equipment are included to cover the several variant models. Operational use is explained, and the text includes many first-hand accounts from Russian aircrew of the period. The book will be superbly illustrated by unique official photographs and manuals. **Monino Museum**

**Moscow** Ken Duffey, 2013-06-19 One of the premier collections of Soviet and Russian aircraft, the Monino museum opened in 1960 and covers an area of about 20 hectares. It has on display more than 173 aircraft and 127 aero engines, with 44 of its exhibits having been declared as monuments of science and technology. The Monino museum charts the history of Soviet and Russian aviation from the earliest pre-revolutionary days until the present time, with exhibits in the form of models, artefacts, posters, aero engines, weapons, etc., as well as airframes, ejection seats, rockets, covering the later period. This book describes and illustrates all the exhibits on display in this amazing museum. It serves as a guide for those visiting Monino and a mouth-watering taste for those unable to get there in person. **Super Snoopers**
