The Origins of Medieval Architecture Charles B. McClendon, 2005-01-01 This book is the first devoted to the important innovations in architecture that took place in western Europe between the death of emperor Justinian in A D 565 and the tenth century During this period of transition from Late Antiquity to the Middle Ages the Early Christian basilica was transformed in both form and function Charles B McClendon draws on rich documentary evidence and archaeological data to show that the buildings of these three centuries studied in isolation but rarely together set substantial precedents for the future of medieval architecture He looks at buildings of the so called Dark Ages monuments that reflected a new assimilation of seemingly antithetical barbarian and classical attitudes toward architecture and its decoration and at the grand and innovative architecture of the Carolingian Empire The great Romanesque and Gothic churches of subsequent centuries owe far more to the architectural achievements of the Early Middle Ages than has generally been recognized the author argues

Viking Silver, Hoards and Containers Jacek Gruszczynski, 2019-01-10 It is widely accepted that the Viking Age c 800 1050 stimulated the development of long distance regional and local trade and exchange networks The clearest archaeological evidence for these contacts is mainly in the form of silver artefacts predominantly found in hoards in Northern and Central Europe the Baltic zone However beyond occasional national or regional level research there have been no attempts at a historically guided comparative archaeological survey of the Baltic zone as a whole By investigating silver hoards and the context of their deposition Viking Silver Hoards and Containers seeks to understand the variety of functions performed by hoards the differences in function within regions the hoards relationship with trade and the nature and function of emporia It also examines the extent to which the findings mesh with literary evidence and the nature of the different societies benefiting from the influx of silver in the Viking Age Crucially the book features a catalogue which provides a thorough overview and update of Baltic zone hoards Viking Silver Hoards and Containers is intended for use by students of and specialists in early medieval Viking and Slavic history and archaeology However it will also be a useful teaching resource for other general courses in archaeology anthropology and material culture numismatics economic history religious studies GIS and statistics
