Williams, 2016-04-28 Both visitor attractions and events play pivotal roles in the appeal of tourism destination regions to visitors by virtue of being the main motivator of tourist trips and determining consumers choices However more recently visitor attractions have become more multifaceted have proliferated and fragmented in terms of form location scale and style and their role is undergoing major changes in a post modern world as a result of consumer demands and competitive innovations Visitor Attractions and Events for the first time theoretically and empirically explores the relations between events and attractions to offer new thinking of the role of space and place in shaping development management practices and strategies in the sector as well as future implications The book reveals how location is pivotal in the development planning and management of visitor attractions and events Whereas the location of natural attractions is relatively fixed in space and their locations cannot be predetermined or relocated human made or contrived attractions are more influenced by the planning process in the context of the locational decision making process Competition and cooperation between visitor attractions and the aspects which shape these relations including complementarities compatibility knowledge spill overs and diffusion of innovations product similarities and spatial proximity remain largely ignored in the visitor attraction sector and thus are major elements in the focus of this book Comparative examples ranging from small to major attractions in a wide variety of locations are included This significant volume will appeal widely to all those interested in the visitor sector such as tourism events leisure studies destination management and sociology **Tourism Expenditure by Domestic Visitors in Regional Australia, 1998** Leanne Johnson, 2000 Domestic tourism is a major contributor to the Australian economy with domestic day and overnight visitors spending substantial sums of money on accommodation food and shopping during their travels Regional Australia benefits considerably from domestic tourism activity as domestic visitors are more likely to travel to regional Australia than international visitors Due to the link between expenditure by visitors to a region and regional economic performance there has been unmet demand for regional estimates of domestic tourism expenditure until now BTR has used a modelling approach in conjunction with data from the 1998 National Visitor Survey to develop consistent estimates of expenditure by domestic day and overnight visitors within

Australia s States Territories and tourism regions
