The New Nanzan Guide to Japanese Religions Matthew D. McMullen, Jolyon Baraka Thomas, 2025-05-31 For nearly two decades the Nanzan Guide to Japanese Religions has served as a valuable resource for students and scholars of religion in Japan. This exciting update expands the audience to include non specialists of Japan while also complicating the notions of Japan and religion. Asking the provocative question why study Japanese religions the editors argue that studying Japan is vital for the academic study of religion writ large and make a case for the continued importance of religious topics in Japan studies broadly conceived. The volume addresses the question of why and how to study Japanese religions in seven sections each overseen by a leading expert in that subfield. The section on Knowledge Production investigates medicine, sacred objects and the politico economic structures undergirding academia. Cosmology and Time reveals how religion shaped worldviews in both premodern and modern Japan by taking up topics such as the afterlife, divination and relationships between science and religion. Space and Environment considers geography, relationships between the human and nonhuman denizens of the Japanese archipelago and religion in Japan's overseas colonies and among diasporic outmigrants. Feelings and Belonging focuses on affective relationships generated through confraternities, homiletics and caring professions. Politics and Governance describes longstanding relationships between religion and the state covering everything from sacred kingship to contemporary electoral politics. The final two sections include practical advice for conducting fieldwork and helpful introductions to several relevant archives. Overall the volume reflects the impact of recent scholarly trends in the study of Japanese religions including material religion studies, affect theory, environmental humanities and critical secularism studies. The breadth of topics as well as the accessibility of the individual chapters makes *The New Nanzan Guide to Japanese Religions* an indispensable resource for the classroom. It will be useful not only for scholars of Japan but also for anyone interested in the academic study of religion.

The Gramophone Compton Mackenzie, Christopher Stone, 1986 *Eating the Other* Simona Stano, 2015-09-04 Food represents an unalienable component of everyday life encompassing different spheres and moments. What is more in contemporary societies migration, travel and communication incessantly expose local food identities to global food alterities activating interesting processes of transformation that continuously reshape and redefine such identities and alterities. Ethnic restaurants fill up the streets we walk while in many city markets and supermarkets local products are increasingly complemented with spices, vegetables and other foods required for the preparation of exotic dishes. Mass and new media constantly provide exposure to previously unknown foods while fusion cuisines have become increasingly popular all over the world. But what happens to food and food related habits, practices and meanings when they are carried from one foodsphere to another? What are the main elements involved in such dynamics? And which theoretical and methodological approaches can help in understanding such processes? These are the main issues addressed by this book which explores both the functioning logics and the tangible effects of one of the most important characteristics of present
