Rules, Reasons, and Norms Philip Pettit,2002-10-31 Philip Pettit has drawn together here a series of interconnected essays on three subjects to which he has made notable contributions The first part of the book deals with the rule following character of thought The second discusses the many factors to which choice is rationally responsive and by reference to which choice can be explained consistently with being under the control of thought The third examines the implications of this multiple sensitivity for the normative regulation of social affairs Thus the volume covers a large swathe of territory ranging from metaphysics to philosophical psychology to the theory of rational regulation The connections that Pettit makes between these areas are original and illuminating Each part of the book develops a key theme The first is that thought succeeds in following rules and overcomes Wittgenstein's rule following problem so far as it is response dependent it is a sort of enterprise that is accessible only to creatures like us for whom certain responses are primitive and shared The second is that while human choice may be sensitive to discursive reasons as we would expect in a thinking subject it can at the same time be subject to the control the virtual control in the model developed here of rational self interest And the third is that the rational interest of agents in achieving esteem in the eyes of others and in avoiding disesteem exercises a virtual form of control that can explain the emergence of norms and various other aspects of social life **The Theory of Institutional Design** Robert E. Goodin,1996-01-26 Problems of institutional design and redesign structuring and restructuring acquired particular poignancy through recent developments from eastern Europe to southern Africa At the same time scholars in each of several disciplines political science economics sociology history and philosophy have increasingly come to appreciate the important independent role that is and should be played by institutional factors in social life In this volume disparate theories of institutional design given by each of those several disciplines are synthesized and their peculiar power illustrated Through analysis of examples ranging from changes in the British welfare state through the transition of eastern European societies to the reward structure of the modern university the contributors emphasize the important interpenetration of normative and
