Transformation of the Textbook James A. LaSpina,2014-04-04 Is the emerging digital multimedia culture of today transforming the textbook or forever displacing it As new media of transmission enter the classroom the traditional textbook is now caught up in a dialogue reshaping the textual boundaries of the book and with it the traditional modes of cognition and learning which are bound more to language than to visual form Most of the important work in the past two decades in the field of curriculum has focused on the culture of the textbook A rich literature has evolved around textbooks as the traditional object of instructional activity This volume is an important contribution to this literature which focuses on the actual making of a textbook This design process serves as a metaphor that suggests new paradigms of learning and instruction in which text content is but one component in a multidimensional information space The Visual Turn is an exploration along the border of this new learning space transforming the traditional center of instruction in the classroom

Preparing Teachers to Teach with Technology Charalambos Vrasidas,Gene V Glass,2005-06-01 Teacher preparation

programs in the United States and around the world have finally begun to address this deficiency in their programs. The realization that technology is a powerful driving force in education coupled with a renewed emphasis on teacher preparation by governments have resulted in some dramatic changes in teacher preparation programs. I believe that we have just begun to see changes in teacher preparation and that the pace of change will continue to accelerate. This volume covers some of the more exciting developments in the field including the emergence of wireless computing in the classroom and the preparation of teachers in an online environment. In short, I am optimistic. For those of you who are also in the field, I think you will agree. For those who are just entering the field, this book is a great place to start as you change education. Finally, while this book is the last book of the three-part series that we at CAIT conceptualized with Charalambos Vrasidas and Gene Glass, it is also the beginning of a new relationship. We are excited to join with a new partner, CARDET, to present this book. Over many years in the education and R/D field, I have come to realize the value of partnerships and relationships. I want to thank both Charalambos and Gene for making this series a reality and such a success. We are looking forward to working with them and CARDET in the near future.

Research in Education, 1971 *Camouflaged* Edwin Mayorga, Bree Picower, Seth Rader, 2008-07-01

Camouflaged: Investigating How the U.S. Military Affects You and Your Community is a tool for educators to help middle and high school aged students explore the role of the military in their lives and in their communities. Local New York City teachers led by the New York Collective of Radical Educators (NYCoRE) generated the *Camouflaged* curriculum with the intent of making it accessible to educators across the country in a variety of settings and curricular areas. NYCoRE believes that it is the role of educators as allies to young people to ensure that students have information from a variety of sources before considering enlisting in the armed forces. At this point in U.S. history, military recruiters have unprecedented access to young people in and out of school through a variety of mediums. This curriculum provides a critical lens to help students navigate recruiters' messages and to examine the role of the military throughout this country's history to the present.
