Navigating Elementary Science Teaching and Learning Sophia Jeong,Lynn A. Bryan,Deborah J. Tippins,Chelsea M. Sexton,2023-09-26

This book is a resource for both prospective and practicing elementary teachers as they learn to teach science in ways which foster the development of a community of science learners with multiple perspectives and diverse approaches to problem solving. It includes cases that feature dilemmas embedded in rich narrative stories which characterize the lives of teachers of science and by extension their students and serve as tools for discussion, critique and reflective practice. The introduction to the book explores changing contexts for elementary science teaching and learning and describes how case based pedagogy can be used as a tool for both instruction and research. Each subsequent section of the book includes cases that are organized around topics such as contemporary approaches to teaching elementary science, new roles for technology and the creation of inclusive learning environments for all students in elementary science. Each case is followed by reflective commentaries and concludes with questions for reflection and discussion. Teachers will benefit from these cases as they explore the complexities and ambiguities of elementary science teaching and learning in today's classrooms.

Teaching Science in Elementary and Middle School Cory A. Buxton, Eugene F. Provenzo, 2007-02-26 I believe the experiments in this text can be well integrated into any science education course and help create an environment of exploration.

Willis Walter Jr Florida AM University This textbook should be a companion of all elementary and middle school pre service and in service teachers who are interested in educating students of different abilities and backgrounds.

Benjamin C Ngwudike Jackson State University Science is almost always thought of as a solitary content area practiced by lone practitioners in isolated laboratories. The reality is that science is highly dependent upon culture and history. This textbook meaningfully presents these relationships in a fashion accessible to college level teacher candidates.

Claudia A Balach Slippery Rock University of Pennsylvania *Teaching Science in Elementary and Middle School A Cognitive and Cultural Approach* is an introductory science curriculum and methods textbook for pre service teachers in primary and middle schools. The primary purpose of the book is to provide an introduction to the teaching of science with an emphasis on guiding the pre service teacher toward conceptual understanding of core standards based science content from the four major scientific disciplines: application of scientific methods and processes of inquiry to the learning of these science concepts; development of scientific language that is both expressive and constitutive in the formation of scientific reasoning; the ability to guide learners through numerous core scientific experiments that help to illuminate items 1-3; evaluation of social and cultural factors that shape and influence both science and science education; analysis of the local context in which science must be understood as well as the global context; synthesis of science as interrelated with other aspects of the world and how this idea can be taught to students through integrated and thematic instruction. The approach throughout is clear and practical and is designed to foster reflective teaching rooted in research and theory.
