endproduct pearl production is unique to this sector In aquatic production health issues are of utmost importance pearl production is based entirely upon health The pearl itself is a product of the oyster's immune defenses as a response to soft tissue irritation Exploited stocks receive frequent handling stresses which often predispose farmed animals to infection and diseases Therefore the importance of health management for pearl oysters is paramount Today most disease problems are caused by opportunistic pathogens taking advantage of oysters weakened by the stress of handling including pearl surgery and sub optimal growing conditions Except for the mass mortalities experienced in Japan the pearl oyster industry have not yet faced the types of epizootics which has impacted mollusk culture elsewhere in the world Development of the industry will inevitably lead to increased risk of disease introduction spread or emergence Against such an unwanted future health management is the critical defense line The objectives of this technical paper are to i review pearl oyster mortalities and disease problems in order to help design programs aimed at reducing the risks from diseases and ii provide technical guidance to pearl oyster farmers and the industry on management of pearl oyster health so that sector development will be sustainable not only in providing huge employment to communities where pearl farms are located but also contributing to maintain environmental integrity Pearl oyster farming can serve as environmental sentinels recognizing the fact that pearl oysters thrive only in pristine environment This publication contains three parts Part 1 consists of pearl oyster health the current interest in it and an overview of the cultured marine pearl industry Part 2 on pearl oyster health management consists of seven sections namely a introduction b general information on husbandry and handling hatchery production introductions and transfers c disease diagnostic protocols dealing with field collections of samples gross external examination gross internal examination and laboratory protocols d health zonation e disease outbreak protocols f national strategies on aquatic animal health and g references Certain countries in the pearl oyster producing regions have acquired a great deal of experience in health management of cultured species Experiences from Australia the Cook Islands Japan the French Polynesia the Philippines China the Persian Gulf and the Red Sea are included in Part 3 which also contains a general review of pearl oyster mortalities and disease problems Publisher's description      *The Oxford Companion to American Military History* ,      *Boating* ,1996-01      *United States Naval Medical Bulletin* ,1912      **Mergent Industrial Manual** ,2001      **Whitaker's Cumulative Book List** ,1975      New Hampshire Register, State Year-book and Legislative Manual ,1977
