

General Term Summary

Grade 6 – Term 1

Language Arts

In Language Arts, we focused on several types of functional writing, and extended our knowledge of reading strategies to deepen our understanding of literature. Our writing practice explored the traits of writing (organization, content, sentence structure, conventions and word choice). Students were also engaged in responding to a variety of writing prompts, which included regular blogging, personal reflections, descriptive paragraphs and persuasive arguments. Our class read aloud focused on the comprehension strategies of self-monitoring, making connections and making inferences. Further, students practiced their ability to manage ideas and information through research and engaged in many research activities that required them to access information, evaluate sources, record information and share their ideas and information. The above concepts were applied to real-world situations, as well as selected texts.

Science

This term we performed an in-depth study of Topic A: Air and Aerodynamics, as well as Topic B: Flight. This included the properties of air, and specific ways that air movement can create lift. The class also focused on making observations as part of Topic C: Evidence and Investigation. Through the study of the topics, we applied the scientific process and used an investigative approach.

Social Studies

6.1 Citizens Participating in Decision Making: The broad focus in Social Studies in Grade 6 is on active citizenship and how we can affect others through our decisions and understanding of the world around us. This term we studied decision-making processes, the components that make up democracy, and how our rights and freedoms are protected in Canada. Students learned and used this information by exploring their values and attitudes, applying their knowledge and understanding, and practicing a variety of skills and processes (active inquiry, critical thinking, reflection and using and managing information).

Mathematics

The strands of Number and Patterns and Relations: While working with these strands, we looked at ways to describe patterns and relationships between numbers, and the different ways that we can write, describe and organize numbers. Students were required to represent and describe patterns and relationships using graphs and tables, understand relationships within tables of values to solve problems, develop and use equations with letter variables (basic algebraic equations), understand and apply the order of operations, demonstrate the meaning of preservation of equality and identify multiples and factors of various numbers.

The strand of Shape and Space: Angles and their relationships in different shapes were examined. Students were required to demonstrate the ability to identify angles in their environment, classify angles according to their measure, determine angle measures in degrees and understand the relationship between angles relative to their shape type (triangles and quadrilaterals).

Students are expected to demonstrate mathematical understanding by explaining their understanding, connecting mathematical ideas to other concepts and subject areas, demonstrating fluency with mental math, developing and applying new mathematical understanding through problem solving, developing mathematical reasoning, selecting and using technology as tools in problems solving and using visualization skills to assist in making connections and with problem solving. All of the above skills were used to solve problems that are encountered in daily life, and show how mathematics can be used in and out of the classroom.

Mocer, 2015-12-14 To better serve the whole child look at the whole report card Students are more than their academic grades you know it and their parents know it The progress they make in social emotional learning and character development is essential to their success in school and in life But while educators have made great strides in improving grading for academic achievement we've left too many teachers still guessing when it comes to outdated behavior ratings and comment sections That's where this book comes in Grounded in research and in the author's work with teachers and administrators it offers guidance on retooling report cards to better reflect the whole child integrating SEL and CD into any school or district wide grading system Resources include Guided exercises for analyzing existing report cards Samples and suggested report card designs Tips on improving communication with parents Case studies highlighting common challenges Testimonials from teachers and students When you take report cards to the next level you make sure that communication reflects all of the important characteristics of success and ensure that students develop the skills they need for the future This book brilliantly illuminates the key role played by social emotional learning in each student's development and it challenges the tradition of relegating the SEL EQ observations to the back of the report card If we want to develop better communities this book shows the way Dr Neil MacNeill PhD EdD Head Master Ellenbrook Independent Primary School The ultimate goal of misbehavior is attention When children don't get the attention they need through the proper behavior they will get it any way they can Children want to be loved and cared about SEL will help them to learn the proper ways to get attention It will also help teachers better understand the misbehaviors and redirect students toward positive behavior Pamela L Opel Teacher Intervention Specialist Gulfport School District [The Conscious Teacher](#) Deborah Nichols Poulos, 2020-01-13 The

Conscious Teacher is about all kinds of strategies and techniques educators might employ to become more effective teachers In an accessible conversational style Deborah Nichols Poulos presents unique approaches to teaching that will inspire new and veteran teachers alike She begins with her personal story of not being able to read all through elementary school Her early failures convinced her she was dumb At first she struggled but when she still failed she adopted an avoidance strategy that served her well until junior high An experience in the seventh grade flipped a switch and started her on a journey to becoming an outstanding student and later to applying the lessons she learned as a child to her own teaching What makes The Conscious Teacher unique are the inspirational lessons that are unlike what most teachers get in their teacher education courses or student teaching Ms Nichols Poulos points out for example that from the very first day it is important that students learn they will be treated with dignity and respect no matter what And especially helpful are the steps Ms Nichols Poulos employs to set up a behavior management plan that works She explains the strategic steps she takes before school starts how essential it is to get to know each student before they walk into class on that first day She also illustrates how

setting up classroom routines helps students know what to expect and how to make the best use of every minute And she emphasizes the importance of the parent student teacher team and includes many examples of how to communicate with and involve parents even those who may be difficult Foundational to her program are reading and writing Among other things she lays out the steps for students even as early as fourth grade to write five paragraph essays and their own student authored books and to research and write reports that include bibliographies When she differentiated curriculum to support all students needs she found their learning accelerated All teachers will appreciate her ideas about how to teach the basics of math as well as advanced math concepts And her ideas for teaching the arts are inspirational as she describes in detail how her fourth graders performed Shakespeare s Hamlet Macbeth King Lear Julius Caesar and A Midsummer Night s Dream She also shows how to integrate social studies with literature and writing Her experiences taught her that young students are much more capable than many people realize The Conscious Teacher is an indispensable guide for all new teachers Many of the ideas Ms Nichols Poulos provides will also be an eye opener for parents and experienced teachers as well The Conscious Teacher is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling

Educational Psychology Angela M. O'Donnell, Johnmarshall Reeve, Jeffrey K. Smith, 2011-12-06 Teachers help students learn develop and realize their potential To become successful in their craft teachers need to learn how to establish high quality relationships with their students and they need to learn how to implement instructional strategies that promote students learning development and potential To prepare pre service teachers for the profession the study of educational psychology can help them to better understand their students and better understand their process of teaching Such is the twofold purpose of Educational Psychology to help pre service teachers understand their future students better and to help them understand all aspects of the teaching learning situation The pursuit of these two purposes leads to the ultimate goal of this text namely to help pre service teachers become increasingly able to promote student learning development and potential when it becomes their turn to step into the classroom and take full time responsibility for their own classes
