CIMA Official Learning System Test of Professional Competence in Management Accounting Nick Best, Kaplan Higher Education, 2009-07-18 CIMA Official Learning Systems are the only textbooks recommended by CIMA as core reading. Written by the CIMA examiners, markers and lecturers, they specifically prepare students to pass the CIMA exams first time. Fully updated to reflect the 2010 syllabus, they are crammed with features to reinforce learning, including step by step coverage directly linked to CIMA's learning outcomes, fully revised examples and case studies, extensive question practice to test knowledge and understanding, integrated readings to increase understanding of key theory, colour used throughout to aid navigation. The Official Learning systems are the only study materials endorsed by CIMA. Key sections written by former examiners for the most accurate up to date guidance towards exam success. Complete integrated package incorporating syllabus guidance, full text recommended articles, revision guides and extensive question practice. **Journal of the House of Representatives** Texas. Breast Imaging Techniques for Radiographers Cristina Poggi, 2024-09-25 This textbook is intended to give most of the information a Mammographer should have to understand and perform successfully breast imaging techniques. It is structured in 6 parts: Basic theory, Technical quality, Clinical quality, on the Report, other breast imaging techniques and Radio Protection, Ergonomics, the academic training and the communication skill. Every part is divided in chapters made up of short paragraphs with very specific titles to give the reader the opportunity to find the answer to her/his question easily. Much importance is given to the image produced, which should be characterized by a very high level of diagnostic information to allow the reader to find the lesion if it is there as early as possible. The topic of how to produce the image is dealt with, then, but also of how to evaluate thoroughly and appropriately the quality of it. Giving this in-depth knowledge was the aim of this work. The book covers up to date information about breast imaging and the surveillance pathway of the patient with breast cancer; it is therefore of significant interest to Radiographers, Technologists, Radiologists, Breast Nurses, Radiographers students, both undergraduate and postgraduate, Physiotherapists.
