Westwood, Karen Barton, 2016-04-01 As one of the learned professions requiring advanced learning and high principles law enjoys a special standing in society In return for its status and rank the legal profession is expected to exhibit the highest levels of honesty trust and morality the very values which underpin the legal system itself This in turn entrusts to legal education a particular problem of addressing not only the substantive elements of the body of law but a means through which the characteristics of the calling of law are imparted and instilled At a time when the very essence of the legal profession is under threat this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry character over eloquence and calling over skill Chapters are grouped around the core content and key themes of Curiosity Calling Character and Conscientiousness Contract and Culture The volume includes contributions from leading experts drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues providing insight and provoking debate **Engines of Anxiety** Wendy Nelson

Espeland, Michael Sauder, Wendy Espeland, 2016-05-09 Students and the public routinely consult various published college rankings to assess the quality of colleges and universities and easily compare different schools However many institutions have responded to the rankings in ways that benefit neither the schools nor their students In *Engines of Anxiety* sociologists Wendy Espeland and Michael Sauder delve deep into the mechanisms of law school rankings which have become a top priority within legal education Based on a wealth of observational data and over 200 in depth interviews with law students university deans and other administrators they show how the scramble for high rankings has affected the missions and practices of many law schools *Engines of Anxiety* tracks how rankings such as those published annually by the U S News World Report permeate every aspect of legal education beginning with the admissions process The authors find that prospective law students not only rely heavily on such rankings to evaluate school quality but also internalize rankings as expressions of their own abilities and flaws For example they often view rejections from first tier schools as a sign of personal failure The rankings also affect the decisions of admissions officers who try to balance admitting diverse classes with

preserving the school's ranking which is dependent on factors such as the median LSAT score of the entering class Espeland and Sauder find that law schools face pressure to admit applicants with high test scores over lower scoring candidates who possess other favorable credentials Engines of Anxiety also reveals how rankings have influenced law schools career service departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet Engines of Anxiety shows that the drive to increase a school's rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways

**Creating an Opportunity Society** Ron Haskins, Isabel V. Sawhill, 2009-10-01 Americans believe economic opportunity is as fundamental a right as life liberty and the pursuit of happiness More concerned about a level playing field for all they worry less about the growing income and wealth disparity in our country Creating an Opportunity Society examines economic opportunity in the United States and explores how to create more of it particularly for those on the bottom rungs of the economic ladder Ron Haskins and Isabel Sawhill propose a concrete agenda for increasing opportunity that is cost effective consistent with American values and focuses on improving the lives of the young and the disadvantaged They emphasize individual

responsibility as an indispensable basis for successful policies and programs The authors recommend a three pronged approach to create more opportunity in America Increase education for children and youth at the preschool K 12 and postsecondary levels Encourage and support work among adults Reduce the number of out of wedlock births while increasing the share of children reared by their married parents With concern for the federal deficit in mind Haskins and Sawhill argue for reallocating existing resources especially from the affluent elderly to disadvantaged children and their families The authors are optimistic that a judicious use of the nation s resources can level the playing field and produce more opportunity for all Creating an Opportunity Society offers the most complete summary available of the facts and the factors that contribute to economic opportunity It looks at the poor the middle class and the rich providing deep background data on how each group has fared in recent decades Unfortunately only the rich have made substantial progress making this book a timely guide forward for anyone interested in what we can do as a society to improve the prospects for our less advantaged families and fellow citizens
