Charity Hardware Software and Liveware are and the greatest of these is Liveware. As information technology ceased to be the prerogative of computer scientists and electronics engineers those of us from other disciplines had to contend with the jargon which was already in vogue. We learned to live with hardware and software. We were less enthusiastic about liveware. Polite and some impolite questioning revealed that liveware was a euphemism for people. We were not amused. As one spirited participant observed I refused to go home and tell my children that Almighty God had made liveware in His own image and likeness. People are too important to be known as anything but people. Moreover it is the importance of people that is the dominating and recurring theme of this book by Christopher Baldry. He deals with virtually every aspect of the problems concerning men and women and their recourse to the equipment. This could well become the definitive work in the field. In addition to the details of health hazards industrial relations new technology agreements and the like Dr Baldry grapples with two great underpinning issues. **Army Sustainment**, 2015 The Department of the Army's official professional bulletin on sustainment publishing timely authoritative information on Army and Defense sustainment plans programs policies operations procedures and doctrine for the benefit of all sustainment personnel. **Occupational Outlook Handbook 2008-2009 (Clothbound)**,
