Notjohn,2017-01-01 The self publisher s bible In this clear and entertaining ten step guide now in its eighth edition a prolific American author tells how he formats his books using free software for upload to online bookstores The secret he explains is to use the universal epub format to create a single e book file that will be accepted by every digital retailer from Amazon com through Barnes more often it doesn t because these programs litter the file with hidden formatting The result can be a disaster Instead the word processing document should be converted to clean HTML the markup language used to create a web page All e books are web pages at heart and the Kindle and other e book readers are just special purpose web browsers The conversion from document to HTML file takes seconds It can then be plugged into a simple template that Notjohn includes in this Guide and also makes
