Andrea DiNardo,2018

Yellow European Plums YEPs contain health promoting compounds which may be extracted for use in functional food and nutraceutical industries Conventional extraction methods include heat reflux extraction HRE and Soxhlet extraction but often result in reduced extraction yields due to high temperature requirements and long extraction durations Microwave assisted

extraction MAE is one method which can mitigate these drawbacks because it allows rapid and homogenous heating the biomatrix. The objective of this thesis is to determine the effects of solvent and solvent concentration time and temperature during MAE in comparison to other extraction methods. Concentration of phenolic compounds specifically ascorbic acid chlorogenic acid neochlorogenic acid were quantified using a Folin Ciocalteu method and HPLC analysis. Antioxidant scavenging of free radicals such as 2,2-diphenyl 1-picrylhydrazyl (DPPH) and Fe³⁺ tripyridyltriazine FRAP were used to determine antioxidant capacity of samples. It was observed that MAE yielded larger concentrations of bioactive compounds in comparison to other extraction methods.

Polyphenols in Plants Ronald Ross Watson, 2018-08-14

Polyphenols in Plants: Isolation, Purification and Extract Preparation 2nd edition provides a detailed insight into polyphenols that occur naturally in plants and how they can be affected during growth and development, then effectively removed and optimized for various applications in food production. Historically, plants have been the major sources for drugs and health promotion. While there are a small number of nutrients contained, the growing focus is on the very diverse complex ring structures, polyphenols that are not nutritious. In order to study or use them in patient treatment, the polyphenols need to be isolated, identified and purified for application and study. This book brings together experts in the field who share their ongoing examination of isolation and purification of polyphenols as well as determination of their structures and composition. Polyphenols in Plants covers a range of new topics including polyphenols in vegetable waste and agricultural byproducts, extraction methods and characterization of polyphenols and isolation techniques in the development of new compounds and their use in cancer therapy. This book will be useful to plant scientists and dietary supplement producers as well as scientists in the food industry and alternative medicine who are interested in the specific health benefits of various dietary extracts and other polyphenol resources. Fully revised and updated to present the latest developments in the field. Advances in understanding of isolation, characterization and identification of critical polyphenols vital to industrial development as therapies. Defines conditions of growth affecting polyphenol levels. Describes techniques critical to identifying and defining polyphenols.
