Prescribing Skills Workbook Daniel Norton, Nicholas Norton, Jane Caisley, Rosie Furner, Elizabeth Hamilton, 2014-05-30 Prescribing medications safely is a cornerstone of clinical practice but students receive little or no teaching in the

practicalities of prescribing. Instead they are often left to learn on the ward which inevitably leaves gaps in their knowledge. Unsurprisingly prescribing errors among junior doctors are common and can cause significant harm to patients. This is a cause for concern with the GMC and a potential solution in the form of a national exam has been proposed. Prescribing Skills Workbook is designed to help students and junior doctors bridge the gap between understanding the science of pharmacology and accurately writing a prescription on a patient's drug chart. The workbook format offers an ideal way to practice by completing a series of realistic life size charts in response to a clinical scenario. The book features 45 exercises each one carefully chosen to test the reader's grasp of a key principle such as management of the patient on warfarin. Each exercise begins with a short scenario next the reader is invited to complete a chart based on the details in the case then follows an answer section containing a correctly completed chart together with a summary of the main clinical and educational aspects of the exercise. Key Points: A unique resource for medical students and foundation doctors to improve their understanding of the principles of safe prescribing and practice the physical act of filling out a drug chart correctly. 45 blank hospital charts replicate the experience of completing a realistic life size prescription with 45 corresponding charts filled out correctly to enable the reader to compare, identify and rectify errors. DRUGCHARTS checklist provides systematic framework for accurate prescribing by highlighting the key items to consider in each case. Key points boxes highlight the main learning objectives in each exercise. Short introductory chapter includes tips for safe prescribing.

health work in emergency situations and the practical psychosocial and spiritual tensions that arise from managing the event and the sequelae. Moreover, it shows that it may be possible to provide a more effective emergency mental health service. This unique edited book presents critical reflections on aspects of mental health work gathered from the hands-on experiences of the personnel. Mental health encounters in the emergency context are described in detail, illustrating not only what emergency nurses and mental health workers do when mental health crises occur but also what they feel about what they do. Written by a diverse team of emergency and mental health nurses and allied professionals currently engaged in emergency care both in hospital and pre-hospital settings, this book will appeal to emergency nurses and allied health professionals alike.

Basic Skills in Interpreting Laboratory Data Mary Lee, 2009-02-26. This new edition of Basic Skills in Interpreting Laboratory Data, 4th Edition, is a case-based learning tool that will enhance your skills in clinical lab test interpretation. It provides fundamentals of interpreting lab test results not only for pharmacy students but also for practitioners as an aid in assessing patient drug treatment responses. It is the only text written by and for pharmacists and provides case studies and practical information on patient therapy. Since the publication of the third edition, much has changed in the clinical lab and in the hospital pharmacy. Consequently, the new fourth edition incorporates significant revisions and a wealth of important new information. NEW TO THIS EDITION: Three new chapters including new information on men's health, women's health, and pharmacogenomics and laboratory tests. Mini-cases embedded in each chapter provide therapy-related examples and reinforce important points made in the text. Quickview Charts give an overview of important clinical information, including reference ranges and critical values. Learning Points focus on a clinical application of a major concept present in the chapter.
