modalities that provide reflection and insight into their work with clients. Additionally, the use of techniques and interventions for play therapy allows a secure and strong supervisory relationship which allows the counselor in training to explore personal and professional goals, verbalize and conceptualize client issues, goals and effective interventions, and develop counselor-client relationships that allow the client to progress during the therapeutic process. However, play therapy techniques and interventions are not often incorporated into the supervision process unless the clinician is a registered play therapist being supervised by a registered play therapist supervisor. *Techniques and Interventions for Play Therapy and Clinical Supervision* is a critical reference source that provides an opportunity for all clinicians to incorporate play therapy techniques and expressive art interventions into the process of supervision. It presents techniques and methods that allow for more effective supervision for counselors in training, which allows for more effective service delivery to clients. Highlighting topics that include play techniques in supervision, cognitive behavioral play therapy, and trauma, this book is ideal for individuals in a university, clinical school, agency, etc. setting who provide supervision for counselors in training, including graduate students and postgraduate students. The book is an excellent supplement for clinical courses at universities with counseling programs and play therapy programs, as well as universities with graduate social work and psychology programs that have play therapy courses and provide play therapy supervision.
