Overing, Ulrike Wiethaus, 2019-10-07 One of the great virtues of *American Medieval Goes North* is its wide range of contributors with fascinatingly diverse relationships to the main terms of analysis There are academic scholars poets filmmakers tribal elders teachers at various levels there are Indigenous people people from settler colonial cultures expats immigrants Their analytic and imaginative encounters with the North catch at the intensely symbolic and political charge of that locus At a time when Medieval Studies cannot afford to ignore the period's popular uptake cannot continue with business as usual in the face of white supremacists brazen appropriations of the Middle Ages this volume points to new possibilities for grappling with the uneasy relationships between the American and the medieval Prof Carolyn Dinshaw New York University *Critical Gaming: Interactive History and Virtual Heritage* Erik Champion, 2016-03-09 This book explains how designing playing and modifying computer games and understanding the theory behind them can strengthen the area of digital humanities This book aims to help digital humanities scholars understand both the issues and also advantages of game design as well as encouraging them to extend the field of computer game studies particularly in their teaching and research in the field of virtual heritage By looking at re-occurring issues in the design playtesting and interface of serious games and game based learning for cultural heritage and interactive history

this book highlights the importance of visualisation and self learning in game studies and how this can intersect with digital humanities It also asks whether such theoretical concepts can be applied to practical learning situations It will be of particular interest to those who wish to investigate how games and virtual environments can be used in teaching and research to critique issues and topics in the humanities particularly in virtual heritage and interactive history
