**STEP 1.** Center window in the opening. **Make sure that the sash lock is positioned to the INSIDE** of the structure.

*Note: In tight installation applications the screen can be removed from the window before installation for easier access to the pre-drilled installation screw holes.*

**STEP 2.** Secure window using 2-1/4" screws fastened through the pre-punched installation holes located on the side walls (as shown above).

**STEP 3.** Fill the gaps, interior, exterior and around the perimeter of the window between the mainframe and wall with an approved polyurethane based sealant such as Vulkem<sup>®</sup> or 100% silicone window and door caulk.

*Caution, over use of expansion foam can make the window too tight in the opening and can negatively impact the operation of the window.*

**STEP 4.** To insure proper water drainage keep weep holes clear and free from obstruction (see above).

*Fit the screen back into the window if it was removed prior to installation. Trim and finish the interior and exterior as desired.*
