R U Medically Curious? Dr. Larry Romane, 2016-04-07 If you're medically curious then you'll love the treasure trove of information that Dr. Larry Romane shares in this little book. This longtime ER doctor has always been surprised at how little people know about medical matters but he knows that knowledge can be challenging to grasp when doctors call a heart attack an acute myocardial infarction and a simple toothache an anaerobic gingival abscess. Romane cuts through that jargon to answer questions such as: Why is everyone getting diabetes? Are brand name medicines safer than generic versions? Do you need antibiotics for upper respiratory infections? He also shares valuable insights such as: A pound of fat contains about 3,500 calories; so cutting 100 calories every day for a year would take off about ten pounds. X-rays may cause future DNA changes in a cell leading to cancer decades in the future and only about five percent of dog bites get infected versus sixty percent of cat bites. Another reason a dog is man's best friend. You'll be surprised by all the medical information you don't know, some of it quite useful. *R U Medically Curious*

Understanding Industrial Design Simon King, Kuen Chang, 2016-01-20 With the coming flood of connected products, many UX and interaction designers are looking into hardware design, a discipline largely unfamiliar to them. If you're among those who want to blend digital and physical design concepts successfully, this practical book helps you explore seven long-standing principles of industrial design. Two present and former design directors at IDEO, the international design and innovation firm, use real-world examples to describe industrial designs that are sensorial, simple, enduring, playful, thoughtful, sustainable, and beautiful. You'll learn how to approach, frame, and evaluate your designs as they extend beyond the screen and into the physical world. Sensorial: create experiences that fully engage our human senses. Simple: design simple products that provide overall clarity in relation to their purpose. Enduring: build products that wear well and live on as classics. Playful: use playful design to go beyond functionality and create emotional connections. Thoughtful: observe people's struggles and anticipate their needs. Sustainable: design products that reduce environmental impact. Beautiful: elevate the experience of everyday products through beauty.
