Working with Foucault in Education Margaret Walshaw, 2007-01-01 Education has a long tradition of opening itself up to new ideas and new ideas are what Working with Foucault in Education is all about The book introduces readers to the scholarly work of Michel Foucault at a level that it neither too demanding not too superficial It demonstrates to students educators scholars and policy makers alike how those ideas might be useful in understanding people and processes in education This new line of investigation creates an awareness of the merits and weaknesses of contemporary theoretical frameworks and the impact these have on the production of educational knowledge Working with Foucault in Education engages readers in selected aspects of education Its ten chapters take a thematic approach and include vignettes that explore issues relating to curriculum development learning to teach classroom learning and teaching as well as research in contemporary society These explorations allow readers to develop a new attitude towards education The reason this is possible is that Foucault provides a language and the tools to deconstruct as well as shift thinking about familiar concepts They also provide the means for readers to participate in educational criticism and to play a role in educational change

Practices of the Self and

Spiritual Practices Sergey S. Horujy, 2015-03-03 In this book Sergey Horujy undertakes a novel comparative analysis of Foucault's theory of practices of the self and the Eastern Orthodox ascetical tradition of Hesychasm revealing great affinity between these two radical subjectless approaches to anthropology. As he facilitates the dialogue between the two he offers both an original treatment of ascetical and mystical practices and an up-to-date interpretation of Foucault that goes against the grain of mainstream scholarship. In the second half of the book Horujy transitions from the dialogue with Foucault to his own work of Christian philosophy rooted in but not limited to the Eastern Christian philosophical and theological tradition. Horujy's thinking exemplifies the postsecular nature of our contemporary period and serves as a powerful invitation to think beyond religious/secular divides in philosophy and Eastern/Western divides in intellectual history. **Knowing Bodies, Moving Minds** Liora Bresler, 2013-11-11 This book aims to define new theoretical/practical and methodological directions in educational research centered on the role of the body in teaching and learning. Based on our phenomenological experience of the world it draws on perspectives from arts education and aesthetics as well as curriculum theory, cultural anthropology and ethnomusicology. These are arenas with a rich untapped cache of experience and inquiry that can be applied to the notions of schooling, teaching and learning. The book provides examples of state-of-the-art empirical research on the body in a variety of educational settings. Diverse art forms, curricular settings, educational levels and cultural traditions are selected to demonstrate the complexity and richness of embodied knowledge as they are manifested through institutional structures, disciplines and specific practices. *Water and Environment in Decision-making* Judith M. van Dijk, 2008 United States Assistance Policy in Africa Shai Divon, Bill Derman, 2017-07-06 From the end of WWII to the end of the Obama administration, development assistance in Africa has been viewed as an essential instrument of US foreign policy. Although many would characterise it as a form of aid aimed at enhancing the lives of those in the developing world, it can also be viewed as a tool for advancing US national security objectives. Using a theoretical framework based on power, *United States Assistance Policy in Africa* examines the American assistance discourse, its formation and justification in relation to historical contexts and its operation on the African continent. Beginning with a problematisation of development as a concept that structures hierarchies between groups of people, the book highlights how cultural, political and economic conceptions influence the American assistance discourse. The book further highlights the relationship between American national security and its assistance policy in Africa during the Cold War, the post-Cold War and the post-9/11 contexts. This book will be of great interest to students and scholars of Development Studies, Political Science and International Relations, with particular interest in US foreign policy, USAID and/or African Studies. *Postmodern and Poststructural Approaches to Nursing Research* Julianne Cheek, 1999-11-18 In the first three chapters the author examines definitions of postmodern and postcultural approaches and ways in which they can be used to influence and inform us about health care. Chapters 4 and 5 look at the practical aspects of proposing and carrying out research projects using these approaches. Cheek concludes by reviewing the

intellectual journey required in coming to grips with the meaning and application of these approaches and she suggests ways in which the reader can continue to grow in his or her pursuit

Electrical World ,1891 Ethics as an Ascetic Experience - Power, Language and the Ambiguity of the Visible in Michel Foucault Abhilash G Nath, 2011-02-17 Essay from the year 2011 in the subject Philosophy Philosophy of the Present language English abstract the directions often and repeatedly taken in most of the works that have been undertaken on Foucault are to place him within the general continental philosophy to examine the theoretical and methodological breaks and continuities within his work and between his work and other major figures in the discipline to examine the nature of his work that is to say whether he can be placed part on the thesis the accepted classics of Continental Thought or with the postmodern post structural antithesis to examine the outcome of his work or what impacts his work has had on Western culture The present study rather asks a very simple and straightforward question and that is how did the way Foucault use historical archaeology allowed him as an analyst to change himself from within Or how Foucault's usage of language constantly changed himself from within Or what is there in language if it comes from outside that transforms the reader from within
