Science Report Sc050021 Sr7:

Twenty Years of Research and Development on Soil Pollution and Remediation in China Yongming Luo, Chen Tu, 2018-01-17 This book reviews the progresses and achievements made in the past 20 years of research on soil pollution and remediation in China and presents 50 review and research articles from all over China including Hong Kong and Taiwan. The authors include scientists, engineers, entrepreneurs and managers from 26 universities, 18 institutes, 4 leading enterprises and 2 government environmental protection departments. The contents cover fundamental research on soil pollution and remediation, technical development, project demonstration, policy and governance. The polluted soil site types include farmland, industrial sites, mining areas and oilfields with heavy metals: cadmium, arsenic, copper, chromium, mercury, lead, zinc, nickel, etc.; organic pollutants: PAHs, PCBs, organochlorine pesticides, phthalate esters, halogenated hydrocarbons, etc.; and metal-organic mixed pollutants. The remediation techniques mainly include physical and chemical remediation, thermal desorption, soil vapor extraction, in situ advanced chemical oxidation, solidification and stabilization, phytoremediation, phytostabilization, phytoextraction by hyperaccumulators, phyto-prevention by low accumulation plants, bioremediation, microbial adsorption and immobilization, microbial degradation, microbe-enhanced phytoremediation and combined remediation merging multiple technologies. The governance and policy section mainly explores laws and regulations, criteria and standards, financial guarantees and the industrial market for soil environment and pollution prevention.

Clay's Handbook of Environmental Health Stephen Battersby, 2013-03 Clay's Handbook of Environmental Health since its first publication in 1933 has provided a definitive guide for the environmental health practitioner or reference for the consultant or student. This twentieth edition continues as a first point of reference reviewing the core principles, techniques and competencies and then outlining the specialist subjects. It has been refocused on the current curriculum of the UK's Chartered Institute of Environmental Health but should also readily suit the generalist or specialist working outside the UK.

Environmental Management in Organizations John Brady, Alison Ebbage, Ruth Lunn, 2013-04-15 Environmental issues can present some daunting operational concerns for all types of organization whether in the private, public and voluntary sectors. Managing them requires environmental professionals with a working knowledge of the rapidly developing body of regulatory measures. This new edition of *Environmental Management in Organizations* provides all the management tools, performance measures and communication strategies that organizations need to manage their environmental responsibilities effectively. Leading experts on each topic provide focused explanations and clear practical guidance as well as setting out the context and the key environmental and management drivers. This edition significantly updates the original handbook to take account of developments in the environmental agenda including new dedicated chapters on climate change, energy, transport, biodiversity and chemicals. Published with IEMA.
