longitudinal study of the literacy development of children attending an Austin Texas area elementary school The reading and  
writing development of this microcosm of at risk children was followed as they progressed from first through fourth grade  
The author poses the question What skills and abilities of the child and what classroom factors appear to foster literacy  
development Included here are the author s models of reading and writing acquisition and application of these models to six  
children three with literacy problems and three with successful literacy development Interviews with the children are  
presented along with measures of their cognitive development and skills samples of their reading and writing from and  
throughout the four year study and an examination of their successes and failures in relations to the models presented in  
earlier chapters Additionally one chapter examines school related factors that may play a role in the children s reading
