### QUESTION 3

- 3.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 6 000 years old, near Mafikeng is almost destroyed because of excessive extraction of water from the nearby Molepo river. The water is extracted for human consumption.

Peat lands like the one near Mafikeng is exceptional and play an important role in storing water as well as preventing climate changes.

Dr Phil-Louis Grundling said that carbon that is 'held' or 'stored' by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during dry seasons.

Dr Grundling said that it might be too late to restore the peat land near Mafikeng but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and frog species that lived in this peat land was also destroyed.

From: *Beeld*, 24 September 2016.

- 3.1.1 Give TWO other reasons (not mentioned in the passage) that can lead to the destruction of wetlands. (2)
- 3.1.2 Discuss reasons from the passage regarding the importance of these specific wetlands for the environment. (4)
- 3.1.3 Suggest a way in which this peat land near Mafikeng can be restored. (2)

*The Seven Secrets of Germany* David B. Audretsch,Erik Lehmann,2016 Europe and much of the developed world have been bogged down by stagnant economic growth and alarmingly high rates of unemployment But not Germany This book reveals seven key aspects of the German economy and society that have provided considerable buoyance in an era of global turbulence      **Towards an embodied**

**science of intersubjectivity: Widening the scope of social understanding research** Ezequiel Di Paolo,Hanne De Jaegher,2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people s intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist

assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes. This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed. Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds. These phenomena include acting and perceiving together, verbal and non verbal engagement, experiences of disconnection, management of relations in a group, joint meaning making, intimacy, trust, conflict, negotiation, asymmetric relations, material mediation of social interaction, collective action, contextual engagement with socio cultural norms, structures and roles etc. These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research. We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena. This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity, the social mind writ large. To contribute to this goal we encouraged contributions in psychology, neuroscience, psychopathology, philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive, from observational to participatory.

Middlebrow Cinema Sally Faulkner, 2016-03-31 Middlebrow Cinema challenges an often uninterrogated hostility to middlebrow culture that frequently dismisses it as conservative which it often is not and feminized or middle class which it often is. The volume defines the term relationally against shifting concepts of high and low and considers its deployment in connection with text, audience and institution. In exploring the concept of the middlebrow this book recovers films that were widely meaningful to contemporary audiences yet sometimes overlooked by critics interested in popular and arthouse extremes. It also addresses the question of socially mobile audiences who might express their aspirations through film watching and traces the cultural consequences of the movement of films across borders and between institutions. The first study of its kind the volume comprises 11 original essays that test the purchase of the term middlebrow across cultures including those of Europe, Asia and the Americas from the 1930s to the present day. Middlebrow Cinema brings into view a popular and aspirational and thus especially relevant and dynamic area of film and film culture. Ideal for students and researchers in this area this book Remaps Popular and arthouse approaches. Explores British, Chinese, French, Indian, Mexican, Spanish national cinemas alongside Continental Hollywood, Queer Transnational cinemas. Analyses Biopic, Heritage, Historical Film, Melodrama, Musical, Sex Comedy genres.

*Educational Response, Inclusion and Empowerment for SDGs in Emerging Economies* Mustafa Öztürk, 2022-08-22. This volume analyzes cases from emerging economies in relation to the global endeavor to promote the vision of sustainable development in all forms of education. It aims to discuss the significance of hearing local voices and understanding local discourse regarding strategies for action for change and the role of educational systems as a means to communicate, promote and educate for the Sustainable Development Goals (SDGs). In this book, emerging economies are defined as newly industrialized countries that have not yet reached developed status but have, in a macro-economic sense, outpaced their developing counterparts. In this context, the book highlights how education in emerging economies could extend conventional economic methods to sustainability issues or depart from money-based calculations and business-dominated values to promotion of real-life considerations and ethical, environmental and humanistic values. With the help of this volume, readers will have a chance to look at educational response, inclusion and empowerment for SDGs in countries with emerging economies and to grasp the synthesis of Education for Sustainable Development, Global Citizenship Education (ESD/GCE) within the overall national educational systems. This volume focuses on early childhood through upper secondary education.

**Imperiled Whiteness** Penelope Ingram, 2023-06-23

In *Imperiled Whiteness*, Penelope Ingram examines the role played by media in the resurgence of white nationalism and neo-Nazi movements in the Obama to Trump era. As politicians on the right stoked anxieties about whites losing ground and being left behind, media platforms turned whiteness into a commodity that was packaged and disseminated to a white populace. Reading popular film and television franchises like *Planet of the Apes*, *Star Trek*, and *The Walking Dead* through political flashpoints such as debates over immigration reform, gun control, and Black Lives Matter protests, Ingram reveals how media cultivated feelings of white vulnerability and loss among white consumers. By exploring the convergence of entertainment news and social media in a digital networked environment, Ingram demonstrates how media's renewed attention to imperiled whiteness enabled and sanctioned the return of overt white supremacy exhibited by alt-right groups in the Unite the Right rally in Charlottesville in 2017 and the Capitol riots in 2021.
