book by Stephen Gislason emerged from his Music Notes collected over many years The topics cover a wide range of interests from the history of instruments music theory composing to the most current technologies involved in music composition and sound recording A special chapter on the Musical Brain explains current knowledge in the brain processing of sound as it applies to language and music decoding A chapter on the Music Business reviews the dramatic changes in music marketed and discusses some of the dilemmas and controversies facing musicians Preface This book emerged from notes I have kept for several decades I have spent much time studying music theory electronics applied to sound reproduction and to performance skills I decided to assemble my music notes so that any person interested in music could benefit from simple clear explanations Music descriptions often are too complicated and the use of terms can be inconsistent and confusing As with other subjects I have tackled I assumed that with a little extra effort more precise descriptions would be welcomed by readers seeking a practical understanding of music The book begins with a consideration of what sound is and how animals use sounds to communicate Music is not a human invention but we do elaborate sound communication more than other animals in our production of both speech and musical performances The discussion continues with noise an important topic that is poorly understood A well informed musician will refrain from making noise and understand Ambrose Bierce when he stated Of all noise music is the less offensive I include acoustic and electronic instruments in my discussions of music creation In my world electronics dominate every aspect of work and play and most music I create and listen to was created stored and distributed electronically The art and science of recording is an important study for all 21st century musicians Increased sophistication about the nature of sound the art of combining musical sounds and the effect on the listener's brain are all required for music to advance beyond noise toward a more effective means of human communication Stephen Gislason 2016 PC Mag , 2001-12-26 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology Department of Defense Provisioning and Other Preprocurement Screening Manual United States.
